Memories of the Classical Underworld in Irish and Caribbean Literature

Madeleine Scherer, 2021-09-20 *Classical Memories* is an intervention into the field of adaptation studies taking the example of classical reception to show that adaptation is a process that can be driven by and produce intertextual memories I see classical memories as a memory driven type of adaptation that draws on and reproduces schematic and otherwise de contextualised conceptions of antiquity and its cultural exports in broadly speaking the twentieth and twenty first centuries These memory driven adaptations differ often in significant ways from more traditional adaptations that seek to either continue or deconstruct a long running tradition that can be traced back to antiquity as well as its canonical points of reception in later ages When investigating such a popular and widespread set of narratives characters and images like those that remain of Graeco Roman antiquity terms like adaptation and reception could and should be nuanced further to allow us to understand the complex interactions between modern works and classical antiquity in more detail particularly when it pertains to postcolonial or post digital classical reception In *Classical Memories* I propose that understanding certain types of adaptations as intertextual memories allows us to do just that
