Selected Works of Yakov Borisovich Zeldovich, Volume II Yakov Borisovich Zeldovich, 2017-03-14 This is the second volume of a two volume collection of over 100 articles spanning half a century of work by the late Soviet scientist Yakov Borisovich Zeldovich The breadth and depth of Zeldovich's work is staggering Author of over twenty books and more than 500 scientific articles he made fundamental contributions in chemical catalysis and kinetics combustion and the hydrodynamics of explosive phenomena nuclear chain reactions and nuclear energy the physics of elementary particles and the large scale structure of the universe and cosmology The importance of this collection lies not only in its documentary value as a collection of key scientific works by a man of genius Zeldovich himself considered his most valuable role to be that of a teacher to convey to young scientists the how of science The author of several excellent textbooks on topics ranging from elementary mathematics to advanced methods of mathematical physics he saw this collection of works enlarged from the original Russian edition as a contribution to that end Commentaries by the author and the editors are included with each paper serving to enhance both the historical and the pedagogical value of this edition The passing of Yakov Borisovich Zeldovich in December 1987 was a loss felt deeply by scientists all over the world This collection of his works serves as a tribute to him as a man a scientist and above all a teacher Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Selected Works of Yakov Borisovich Zeldovich, Volume I Yakov Borisovich Zeldovich, 2014-07-14 Selected Works of

Yakov B. Zeldovich is a two volume collection of over 100 articles spanning half a century of work by the late Soviet scientist Yakov Borisovich Zeldovich. The breadth and depth of Zeldovich's work is staggering. Author of over twenty books and more than 500 scientific articles, he made fundamental contributions in chemical catalysis and kinetics, combustion and the hydrodynamics of explosive phenomena, nuclear chain reactions and nuclear energy, the physics of elementary particles and the large scale structure of the universe and cosmology. The importance of this collection lies not only in its documentary value as a collection of key scientific works by a man whose genius was characterized by the Soviet physicist Andrei Sakharov as probably unique. Zeldovich himself considered his most valuable role to be that of a teacher to convey to young scientists the how of science. The author of several excellent textbooks on topics ranging from elementary mathematics to advanced methods of mathematical physics, he saw this collection of works enlarged from the original Russian edition as a contribution to that end. Here one can see the scientific method at work and all the enthusiasm, the breakthroughs and the mistakes associated with real scientific endeavor. Commentaries by the author and the editors are included with each paper serving to enhance both the historical and the pedagogical value of this edition. Originally published in 1992, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Buried Glory Istvan Hargittai, 2013-09-19 A chronicle of the lives of twelve notable and celebrated Soviet scientists from the Cold War era, a time of great scientific achievement in the USSR. **Science In Moscow: Memorials Of A Research Empire** Istvan Hargittai, Magdolna Hargittai, 2019-08-20 The statuary and monuments catalogued in this impressive body of work are accompanied by descriptions of the subjects, their work and achievements. Chemistry World Moscow is the center of science and higher education of Russia and is also an international hub of science. There have been milestone achievements of science in Russia and the Soviet Union, especially in the areas of physics, chemistry, mathematics, the conquest of space, various technologies and medicine. However, the scientists and inventors often created in isolation and have become less known than their discoveries would justify. At the same time, there is no other city in the world that has so many memorials.

honoring scientists as Moscow There is a caveat in that political considerations have often influenced who was remembered and who was not This book presents statues memorial plaques and historical buildings Not only celebrated excellences are mentioned but also some of the greats that perished during the years of terror The book is full of human drama and 750 photos illustrate the narrative Science in Moscow follows Budapest Scientific and New York Scientific and is the third in the series about memorials of scientists in great cities of the world Zeldovich R.A. Sunyaev, 2004-06-15 Ya B Zeldovich was certainly one of the greatest physicists and cosmologists of the 20th century This volume presents reminiscences of this exemplary academician providing biographical and historical insights from colleagues who knew him best Zeldovich's achievements are outlined including those in relativistic astrophysics and cosmology the
