Slavic Prosody Christina Y. Bethin, 1998-07-13 In Slavic Prosody first published in 1998 Professor Bethin gives a coherent account of the Slavic languages at the time of their differentiation and relates these developments to issues in phonological theory First Professor Bethin argues that the syllable structure of Slavic changed before the fall of the jers and suggests that intrasyllabic and intersyllabic reorganization in Late Common Slavic was far more significant for Slavic prosody than the loss of weak jers She then makes a case for the existence of a bisyllabic prosodic domain in Late Common Slavic and trochaic metrical organization Finally she explores the implications of Slavic data for phonological theory discussing sonority skeletal structure the representation of length and prominence and language typology in some detail *Interviews in the history of linguistics: Volume I* James McElvenny, 2022-10-20 This volume brings together transcripts of ten interviews from the podcast series History and Philosophy of the Language Sciences covering topics in the history of modern European linguistics from the beginning of the nineteenth century to the mid twentieth century The transcripts have been reviewed and edited for clarity and completeness **The Blackwell Companion to Phonology, 5 Volume Set** Marc van

The Language of the Inka since the European Invasion Bruce Mannheim, 2013-08-26. The Inka empire Tawantinsuyu fell to Spanish invaders within a year's time 1532-1533, but Quechua, the language of the Inka, is still the primary or only language of millions of Inka descendants throughout the southern Andes. In this innovative study, Bruce Mannheim synthesizes all that is currently known about the history of Southern Peruvian Quechua since the Spanish invasion, providing new insights into the nature of language change in general, into the social and historical contexts of language change, and into the cultural conditioning of linguistic change. Mannheim first discusses changes in the social setting of language use in the Andes from the time of the first European contact in the sixteenth century until today. He reveals that the modern linguistic homogeneity of Spanish and Quechua is a product of the Spanish conquest, since multilingualism was the rule in the Inka empire. He identifies the social and political forces that have influenced the kinds of changes the language has undergone. And he provides the first synthetic history of Southern Peruvian Quechua, making it possible at last to place any literary document or written text in a chronological and social context. Mannheim also studies changes in the formal structure of Quechua. He finds that changes in the sound system were motivated primarily by phonological factors and also that the changes were constrained by a set of morphological and syntactic conditions. This last conclusion is surprising since

most historical linguists assume that sound change is completely independent of other aspects of language. Thus, *The Language of the Inka since the European Invasion* makes an empirical contribution to a general theory of linguistic change. Written in an engaging style that is accessible to the nonlinguist, this book will have a special appeal to readers interested in the history and anthropology of native South America.

Analysing Structure in Academic Writing Tomoko Sawaki, 2016-09-14

This book breaks through formalistic traditions to propose a new generic structure analytical framework for academic writing. The integrated approach, taking lessons from cognitive linguistics and structuralism, offers a foundation for establishing research and pedagogy that can promote diversity and inclusion in academia. The simplicity of the flexible structure analytical model proposed by Sawaki enables the user to analyse diverse instances of genre. Further innovation is made in the analysis of generic structure components by integrating George Lakoff and Mark Johnson's metaphor analysis method, so that the model can account for cultural and ideological patterns that structure our abstract thinking. Using these integrations, the author has established a structure analytical model that can take into account linguistic, cognitive, and pragmatic aspects of genre. Researchers in the fields of linguistics, discourse studies, cultural studies, education, and English for Academic Purposes will be able to use this model to identify whether an atypical instance in academic texts is a result of the writer's individual failure or a failure to understand diversity in academic writing.
