Changing Sex Bernice L. Hausman, 1995 **Changing Sex** takes a bold new approach to the study of transsexualism in the twentieth century By addressing the significance of medical technology to the phenomenon of transsexualism Bernice L Hausman transforms current conceptions of transsexuality as a disorder of gender identity by showing how developments in medical knowledge and technology make possible the emergence of new subjectivities Hausman s inquiry into the development of endocrinology and plastic surgery shows how advances in medical knowledge were central to the establishment of the material and discursive conditions necessary to produce the demand for sex change that is to both make and think the transsexual She also retraces the hidden history of the concept of gender demonstrating that the semantic distinction between natural sex and social gender has its roots in the development of medical treatment practices for intersexuality the condition of having physical characteristics of both sexes in the 1950s Her research reveals the medical institution s desire to make heterosexual subjects out of intersexuals and indicates how gender operates semiotically to maintain heterosexuality as the norm of the human body In critically examining medical discourses popularizations of medical theories and transsexual autobiographies Hausman details the elaboration of gender narratives that not only support the emergence of transsexualism but also regulate the lives of all contemporary Western subjects **Changing Sex** will change the ways we think about the relation between sex and gender the body and sexual identity and medical technology and the idea of the human

The SAGE Encyclopedia of Trans Studies Abbie E. Goldberg, Genny Beemyn, 2021-02-26 Transgender studies broadly defined has become increasingly prominent as a field of study over the past several decades particularly in the last ten years The experiences and rights of trans people have also increasingly become the subject of news coverage such as the ability of trans people to access restrooms their participation in the military the issuing of driver s licenses that allow a third gender option the growing visibility of nonbinary trans teens the denial of gender affirming health care to trans youth and the media s misgendering of trans actors With more and more trans people being open about their gender identities doctors nurses psychologists social workers counselors educators higher education

administrators student affairs personnel and others are increasingly working with trans individuals who are out But many professionals have little formal training or awareness of the life experiences and needs of the trans population This can seriously interfere with open communications between trans people and service providers and can negatively impact trans people s health outcomes and well being as well as interfere with their educational and career success and advancement Having an authoritative academic resource like The SAGE Encyclopedia of Trans Studies can go a long way toward correcting misconceptions and providing information that is otherwise not readily available This encyclopedia featuring more than 300 well researched articles takes an interdisciplinary and intersectional approach to trans studies Entries address a wide range of topics from broad concepts e g the criminal justice system activism mental health to specific subjects e g the trans pride flag the Informed Consent Model voice therapy to key historical figures events and organizations e g Lili Elbe the Stonewall Riots Black Lives Matter Entries focus on diverse lives identities and contexts including the experiences of trans people in different racial religious and sexual communities in the United States and the variety of ways that gender is expressed in other countries Among the fields of studies covered are psychology sociology history family studies K 12 and higher education law political science medicine economics literature popular culture the media and sports

The First Man-Made Man Pagan Kennedy,2008-12-11 In the 1920s when Laura Dillon felt like a man trapped in a woman s body there were no words to describe her condition transsexual had yet to enter common usage And there was no known solution to being stuck between the sexes In a desperate bid to feel comfortable in her own skin she experimented with breakthrough technologies that ultimately transformed the human body and revolutionized medicine Michael Dillon s incredible story from upper class orphan girl to Buddhist monk reveals the struggles of early transsexuals and challenges conventional notions of what gender really means

Out of the Ordinary Michael Dillon/Lobzang Jivaka,2016-11-01 Now available for the first time more than 50 years after it was written is the memoir of Michael Dillon Lobzang Jivaka 1915-62 the British doctor and Buddhist monastic novice chiefly known to scholars of sex gender and sexuality for his pioneering transition from female to male between 1939 and 1949 and for his groundbreaking 1946 book *Self A Study in Ethics and Endocrinology* Here at last is Dillon Jivaka s extraordinary life story told in his own words *Out of the Ordinary* captures Dillon Jivaka s various journeys to Oxford into medicine across the world by ship within the major narratives of his gender and religious journeys Moving chronologically Dillon Jivaka begins with his childhood in Folkestone England where he was raised by his spinster aunts and tells of his days at Oxford immersed in theology classics and rowing He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school He details his worldwide travel as a ship s surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects followed by his outing by the British press while he was serving aboard *The City of Bath* *Out of the Ordinary* is not only a salient record of an early sex transition but also a

unique account of religious conversion in the mid twentieth century Dillon Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet Ultimately while Dillon Jivaka died before becoming a monk his novice ordination was significant It made him the first white European man to be ordained in the Tibetan Buddhist tradition Out of the Ordinary is a landmark publication that sets free a distinct voice from the history of the transgender movement *The Terrible We* Cameron Awkward-Rich,2022-08-08 In *The Terrible We* Cameron Awkward Rich thinks with the bad feelings and mad habits of thought that persist in both transphobic discourse and trans cultural production Observing that trans studies was founded on a split from and disavowal of madness illness and disability Awkward Rich argues for and models a trans criticism that works against this disavowal By tracing the coproduction of the categories of disabled and transgender in the United States at the turn of the twentieth century and analyzing transmasculine literature and theory by Eli Clare Elliott DeLine Dylan Scholinski and others Awkward Rich suggests that thinking with maladjustment might provide new perspectives on the impasses arising from the conflicted relationships among trans feminist and queer In so doing he demonstrates that rather than only impeding or confining trans life thought and creativity forms of maladjustment have also been and will continue to be central to their development Duke University Press Scholars of Color First Book Award recipient *Seeking a Role* Brian Harrison,2009-03-26 An impressively detailed but also unusually wide ranging analysis of post war Britain in the 1950s and 60s covering everything from international relations to family life the countryside to manufacturing religion to race cultural life to political structures

Transgender Health Ben Vincent,2018-06-21 This guide shows how to sensitively treat and care for transgender patients in healthcare settings Distilling cutting edge research into practical advice it covers everything from referral procedures to respectful language and insights on the wider social and ethical issues experienced by this growing client group

Self-made Men Henry Rubin,2003 In *Self Made Men* Henry Rubin explores the production of male identities in the lives of twenty two FTM transsexuals people who have changed their sex from female to male The author relates the compelling personal narratives of his subjects to the historical emergence of FTM as an identity category In the interviews that form the heart of the book the FTMs speak about their struggles to define themselves and their diverse experiences from the pressures of gender conformity in adolescence to being mistaken for butch lesbians from hormone treatments and surgeries to relationships with families partners and acquaintances Their stories of feeling betrayed by their bodies and of undergoing a second puberty are vivid and thought provoking Throughout the interviews the subjects claims to having core male identities are remarkably consistent and thus challenge anti essentialist assumptions in current theories of gender embodiment and identity Rubin uses two key methods to analyze and interpret his findings Adapting Foucault's notions of genealogy he highlights the social construction of gender categories and identities His account of the history of

endocrinology and medical technologies for transforming bodies demonstrates that the family resemblance between transsexuals and intersexuals was a necessary postulate for medical intervention into the lives of the emerging FTMs The book also explores the historical emergence of the category of FTM transsexual as distinguished from the category of lesbian woman and the resultant border disputes over identity between the two groups Rubin complements this approach with phenomenological concepts that stress the importance of lived experience and the individual's capacity for knowledge and action An important contribution to several fields including sociology of the body gender and masculinity human development and the history of science *Self Made Me* will be of interest to anyone who has seriously pondered what it means to be a man and how men become men
