Jeffrey F. Keuss

Self And Simulacra:

Self and Simulacra Liz Waldner, 2001 From airy lyric to ornate lament couched in the Latinate language of Gray's Botany or the lushness of Sir Thomas Browne *Self and Simulacra* explores the motive force of longing in the growing of identity *Reading Simulacra* M. W. Smith, 2001-09-06 Traces the ways in which our culture has increasingly become a culture of simulations and offers strategies for discerning meaning in a world where the difference between what is real and what is simulated has collapsed

The Modern Construction and Postmodern Deconstruction of Self Kire Sharlamanov, Mia Kostovska, 2025-02-21 This book aims to explain the self as understood decades ago and its evolution in the time of postmodernism Approaching it primarily from a sociological perspective while incorporating insights from psychology and philosophy it portrays the modern self as a unitary coherent unified subject created in the time of modernity which during postmodernism has evolved into a fluid decentralized and fragmented subject with increasingly independent multiple identities The creation of the modern self has been influenced by individualization rationalization and power Each factor is explored in a separate chapter detailing its impact on the development of the modern Cartesian self The authors draw on the theories of Goffman Bauman and Baudrillard to illustrate the changing nature of the self viewing it as a performer a fluid entity and a simulacrum While Goffman is not strictly a postmodern author his ideas foreshadow postmodernism particularly regarding the transformation of the self Bauman and Baudrillard as key figures in postmodern thought provide valuable insights into this transformation of the self in contemporary times The book uniquely connects two time periods in which the self evolves arguing that social factors influence its changing characteristics As these social factors shift over time so does the self Key aspects of the self and its evolution are examined through an original multidimensional approach that spans a longer time interval

Baudrillard in Plain English Robert Flix, Baudrillard in Plain English Understanding Simulacra Simulation and Hyperreality is your guided tour through the glittering disorienting world of Jean Baudrillard the French philosopher who claimed that reality itself had been replaced by its own reflection This is not a dry academic treatise It's a lucid darkly funny exploration of why the news feels scripted why politics looks like theater why we perform ourselves online and why every attempt to get back to reality feels like another filter With sharp wit and a sense of irony worthy of Baudrillard himself this book explains Who Baudrillard was from Marxist sociologist to metaphysical prankster What he meant by simulacra simulation and hyperreality Why he predicted the Internet before it existed How his ideas shaped pop culture from The Matrix to Black Mirror to TikTok existentialism Why both left and right misunderstood him completely And what might still remain of the real after postmodernism has eaten itself Whether you're a philosophy student trying to decode postmodern theory an artist wrestling with authenticity or just someone who's ever thought this world feels fake this book will give you the tools and the jokes to understand why Accessible irreverent and unsettlingly relevant Baudrillard in Plain English turns high theory into a mirror you can't look away from Welcome to hyperreality Please enjoy your stay The

Freedom of the Self Jeffrey F. Keuss, 2010-07-01 Freedom of the Self revitalizes the question of identity formation in a postmodern era through a deep reading of Christian life in relation to current trends seen in the Emergent and Missional church movements By relocating deep identity formation as formed and released through a renewed appraisal of kenotic Christology coupled with readings of Continental philosophy Derrida Levinas Marion and popular culture Keuss offers a bold vision for what it means to be truly human in contemporary society as what he calls the kenotic self In addition to providing a robust reflection of philosophical and theological understanding of identity formation from Aristotle and Augustine through to contemporary thinkers Freedom of the Self suggests some tangible steps for the individual and the church in regard to how everyday concerns such as economics literature and urbanization can be part of living into the life of the kenotic self

Self-Organization and Society Takatoshi

Imada, 2008-04-15 Self organization is a generic term describing the capacity of a system to change its own structure by itself while interacting with the environment In this sense self organization is not environment determined or environment adaptive but is self determined and self adaptive The concept of self organization was born in the 1960s and attempts were made to establish a theory based on the logic of a system and its control In contrast the 1980s introduced a view based on the logic of creative individuals and on fluctuations Antithetical differences exist between the two The former regards the system of aggregated individuals as the object of consideration where self organization is the sum of the practices of a system led by control or self control in particular The latter focuses on the practices of individuals deviating from the logic of a system making the existing system fluctuate and transforming its structure This volume attempts to integrate these viewpoints through inquiry into the structure of the self and through self reflexion A new horizon thus opens for the synthesis of planning control action theory and spontaneous performative action theory

Alienation, Society, and the Individual

R. Felix Geyer, Walter R. Heinz, 1992-01-01 The concept of alienation is an umbrella concept that includes powerlessness meaninglessness social isolation cultural estrangement and self estrangement For researchers the study of alienation is a three fold task first understanding the discrepancy between individual values and actions and general living and working conditions second analyzing the overt and latent forms of oppression in social structures third accounting for social circumstances that hinder or facilitate individual or collective action against those alienating structures Alienation Society and the Individual provides a timely and broadly representative overview of the most recent developments in alienation

research and theory Alienation Society and the Individual makes it clear that alienation research has come of age Further theoretical developments remain important and as demonstrated In this volume which revives theoretical debate so as to reformulate classical concepts in view of developments in modern society the concept of alienation is now increasingly applied to empirical research in a variety of fields Included here are theory driven evaluations of empirical research on migrant workers as well as comparative studies on differing liberation ideologies in South Africa This volume reflects the effects of political developments in Eastern Europe on Marxist alienation theory While Marxist theory remains important it is no longer directed exclusively toward criticism of capitalist society New applications include a critique of Eastern European state socialism analysis of consumer rather than capitalist society and uncommon examples of empirical research carried out within a Marxist framework The book concludes with a chapter that evaluates recent theoretical and methodological innovations and sets priorities for future research Alienation Society and the Individual offers an unusual combination of theory and practice that make it a state of the art volume It will be read by sociologists political scientists social psychologists philosophers and anthropologists

Fantasies of Self-Mourning Ruben Borg, 2019-01-07 In Fantasies of Self Mourning Ruben Borg describes the formal features of a posthuman cyborgian imaginary at work in modernism The book's central claim is that modernism invents the posthuman as a way to think through the contradictions of its historical moment Borg develops a posthumanist critique of the concept of organic life based on comparative readings of Pirandello Woolf Beckett and Flann O'Brien alongside discussions of Alfred Hitchcock Chris Marker B la Tarr Ridley Scott and Mamoru Oshii The argument draws together a cluster of modernist narratives that contemplate the separation of a cybernetic eye from a human body or call for a tearing up of the body understood as a discrete organic unit capable of synthesizing desire and sense perception
