LeCron, 1970 Mind/Body Integration S. Ancoli, Erik Peper, M. Quinn, 2012-12-06 Biofeedback training is a research methodology and training procedure through which people can learn voluntary control over their internal physiological systems It is a merger of multiple disciplines with interest deriving from many sources from basic understanding of psychophysiology to a desire for enhanced self awareness The goals of biofeedback are to develop an increased awareness of relevant internal physiological functions to establish control over these functions to generalize control from an experimental or clinical setting to everyday life and to focus attention on mind body integration Biofeedback is explored in many different settings In the university biofeedback equipment and applications can be found in the departments of experimental and clinical psychology counseling physiology biology education and the theater arts as well as in the health service student infirmary Outside the university biofeedback may be found in different departments of hospitals such as physical medicine private clinics education and self awareness groups psychotherapy practices and elsewhere Its growth is still expanding and excitement is still rising as a result of biofeedback's demonstration that autonomic functions can be brought under voluntary control and that the long standing artificial separation between mind body and consciousness can be disproven Happiness and Positive Psychology Sandie

McHugh, Jerome Carson, 2025-06-30 Happiness and Positive Psychology is essential reading for academic professionals in Positive Psychology seeking theoretical insights and for students in Positive Psychology programs looking for foundational knowledge and practical insights **Recrafting a Life** Charles Johnson, Denise Webster, 2013-05-13 Chronic illness and pain are now more than ever seen as major problems in the current health care system Because they are unresponsive to both antibiotics and surgery they are seen as elusive and mysterious The National Medical Expenditure Survey estimates that over 80 million U S citizens live with a chronic illness The most prevalent are arthritis diabetes respiratory diseases hypertension and mental illness This book uses the novel Robinson Crusoe as an archetypal metaphor for the patients who must learn to survive on their own isolated island of chronic pain This unique style is combined with a variety of in session approaches and other tools which clients have found helpful in identifying their goals and progress By emphasizing the importance of self care the authors hope to diminish the sense of helplessness felt by the both the patients their loved ones
