Self Determined Learning Theory Construction Verification And Evaluation:

Self-Determined Learning Theory Deirdre K. Mithaug, 2015-06-12 This volume brings together four semi autonomous bodies of research choice self determination self regulation and self management to form a new theory of self engaged learning entitled Self Determined Learning Theory This theory explains why and how students self engage It identifies the factors that give students the sense of control over their learning that is needed for sustained adaptive and ultimately successful learning It begins by describing the characteristics of disengaged learners then describes and illustrates self determined learning theory within both normal and special populations It then examines the theory s predictive value across several special population contexts and then concludes with a critique of the theory s credibility and worth Divided into three sections theory construction theory verification and theory evaluation this volume is organized using the four steps of a previous book Learning to Theorize A Four Step Strategy Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing Step 3 evaluates the credibility and worth of the explanation constructed in Step 2 Step 4 adjusts existing beliefs so they are consistent with the new theory Although aimed primarily at leaders in special education it should also appeal to researchers and scholars in psychology educational psychology and school psychology who are interested in the applications of self regulated learning theory in this case to special populations

Self-determined Learning Theory ,2003 **Self-determined Learning Theory** Deirdre K. Mithaug, Martin Agran, James E. Martin, Michael L. Wehmeyer, 2002-12-18 This volume brings together four semi autonomous bodies of research choice self determination self regulation and self management to form a new theory of self engaged learning entitled Self Determined Learning Theory This theory explains why and how students self engage It identifies the factors that give students the sense of control over their learning that is needed for sustained adaptive and ultimately successful learning It begins by describing the characteristics of disengaged learners then describes and illustrates self determined learning theory within both normal and special populations It then examines the theory s predictive value across several special population contexts and then concludes with a critique of the theory s credibility and worth Divided into three sections theory construction theory verification and theory evaluation this volume is organized using the four steps of a previous book Learning to Theorize A Four Step Strategy Step 1 defines a problem of not understanding something as discrepancy between what is known and not known about a circumstance Step 2 searches for information and explanations to change the condition of not knowing into a condition of knowing Step 3 evaluates the credibility and worth of the explanation constructed in Step 2 Step 4 adjusts existing beliefs so they are consistent with the new theory Although aimed primarily at leaders in special education it should also appeal to researchers and scholars in psychology educational psychology and school psychology who are interested in the applications of self regulated learning theory in this case to special populations **The Oxford Handbook of Positive**

Psychology and Disability Michael L. Wehmeyer, 2013-09-19 This handbook is the first comprehensive text on positive psychology and disability Emphasizing paradigmatic changes in understanding disability the text covers traditional disciplines in positive psychology and applications of positive psychology to domains like education or work International Review of Research in Mental Retardation, 2006-04-11 Volume 31 of the International Review of Research in Mental Retardation is a thematic exploration of personality and motivation in persons with mental retardation Looking at a broad spectrum of intellectual disabilities Mental Retardation Personality and Motivational Systems explores motivation as a moderator for performance and individualized effort Coverage includes discussions of intrinsic and extrinsic motivation in both mentally retarded and non retarded children self determination interpersonal decision making in adolescents and adults with mental retardation interpersonal relationships and the connection between etiological specific differences and motivation to form behavioral phenotypes A final chapter presents a transactional perspective on human ability relying on constructs of intelligence cognitive processes and motivation with implications for developmental interventions in the lives of persons with mental retardation Explores personality and motivation in persons with mental retardation Discusses intrinsic and extrinsic motivation in both mentally retarded and non retarded children A useful reference for researchers and scholars in developmental and cognitive psychology as well as neuropsychology **Exceptionality, Volume 11: Academic Strategy Instruction, Part II: Number 1** Edwin S. Ellis, Marcia L. Rock, 2003 This special issue Part II in a series devoted to the topic of strategic instruction explores the issue of traversing the research to practice abyss through the implementation of authentic and effective business development It reminds us that business as usual approaches to teacher in service programs are unlikely to produce meaningful changes in teachers classroom practices In addition this issue offers strategic instructional approaches to facilitate students learning and focuses on structuring instruction to promote self regulated learning Each article raises important questions about existing practices and offers innovative alternatives to improve outcomes for students and teachers **Self-instruction Pedagogy** Dennis E. Mithaug, 2007 This book describes a method of teaching that fosters autonomous learning in all students including students with disabilities The pedagogy is based on decades of research on strategy instruction as well as on a theory of learning that claims these four conditions promote self determined learning in all learners 1 opportunities to choose expectations for gaining something from a learning challenge 2 strategies that regulate responses to meet those expectations 3 comparisons between results and expectations that provoke additional adjustment in expectations and responses and 4 persistent engagement and adjustment until results match expectations The pedagogy of self instruction described in this book anchors these conditions in everyday instruction so students can learn by adjusting to their own expectations Chapter 1 compares this approach to the teacher directed methods of direct instruction that require teachers to set expectations for students control how students respond to them evaluate the outcomes they produce and then prescribe adjustments students must make to improve Chapter 2 provides

evidence that too much of special education instruction reflects this teacher directed approach and as a consequence discourages students from learning how to learn on their own Chapters 3 6 identify four ways to shift learning control from teachers to students and Chapters 7 and 8 identify the obstacles to achieving this instructional shift in special education The appendices of the book provide a bibliography of research on self instruction and direct instruction pedagogies and a validated self assessment that can evaluate the directedness of your teaching Teaching Students to Become Self-Determined Learners Michael Wehmeyer,Yong Zhao,2020-04-28 Children are born learning machines who want to learn and can organize and manage their own learning Unfortunately today children have little choice over what they do in school and how and when they do it Children prepared in this other determined manner will be poorly equipped to navigate an adult world requiring that they act autonomously and self direct learning to acquire skills in rapidly changing environments In Teaching Students to Become Self Determined Learners Michael Wehmeyer and Yong Zhao explore the how and why of self determined learning which emphasizes autonomy and choice turning over ownership for learning to students by supporting them in engaging in activities that are of personal value to them thus enabling them to act volitionally You ll learn How to promote self determined learning in your classroom or school The importance of autonomy supports competence supports and relatedness supports Conditions that enable self determined learning Teaching strategies for self determined learning Assessment strategies in self determined learning The role of technology in self determined living The practical strategies case studies advice and resources here will help you help your students to motivate themselves and become self determined learners The SAGE Encyclopedia of Theory in Psychology Harold L. Miller, Jr.,2016-01-05 Drawing together a team of international scholars The SAGE Encyclopedia of Theory in Psychology examines the contemporary landscape of all the key theories and theorists presenting them in the context needed to understand their strengths and weaknesses Key features include Approximately 300 signed entries fill two volumes Entries are followed by Cross References and Further Readings A Reader s Guide in the front matter groups entries thematically A detailed Index and the Cross References provide for effective search and browse in the electronic version Back matter includes a Chronology of theory within the field of psychology a Master Bibliography and an annotated Resource Guide to classic books in this field journals associations and their websites The SAGE Encyclopedia of Theory in Psychology is an exceptional and scholarly source for researching the theory of psychology making it a must have reference for all academic libraries Strengths-Based Approaches to Educating All Learners with Disabilities Michael L. Wehmeyer,2019-03-08 Michael Wehmeyer a leading scholar with over four decades of experience as a teacher teacher educator researcher and advocate provides a cogent but accessible account of the evolution of special education Offering a compelling vision of where the field should be headed in the next decade he notes how the digital revolution has made it possible for all learners to gain access to content and instruction This text focuses on the need to consider how young people with and without disabilities learn and the importance of creating

personalizable education as strengths based approaches to disability move education away from diagnosis and remediation to schoolwide instruction for all students This book is not written as a criticism of traditional special education models but instead examines the big ideas for going beyond special education that can improve outcomes for learners with disabilities and prepare them for the 21st century world Book Features Provides a framework for reconceptualizing how students with disabilities are educated Content aligns with changing contexts and innovations in education including personalizable education and self determined learning Identifies current well established practices that can facilitate efforts to address 21st century learning needs for learners with disabilities Written in a conversational voice for a broad audience to stimulate consideration of future directions for special education
