Complementary Medicine in Australia and New Zealand Hans Baer,2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States *Managing Long-term Conditions and Chronic Illness in Primary Care* Judith Carrier,2015-06-29 Effective management of long term conditions is an essential part of contemporary nursing policy and practice Systematic and evidence based care which takes account of the expert patient and reduces unnecessary hospital admissions is vital to support those with long term conditions chronic diseases and those who care for them Reflecting recent changes in treatment the nurse s role and the patient journey and including additional content on rehabilitation palliative care and non medical prescribing this fully updated new edition highlights the key issues in managing long term conditions It provides a practical and accessible guide for nurses and allied health professionals in the primary care environment and
