Purewal,2024-11-01

This title was first published in 2000 The privatization of former social state housing through recent public private partnerships is becoming increasingly prevalent in Third World as well as in Western countries In most Third World countries this shift has had profound effects upon the patterns of access of shelter Drawing on studies of South Asian and other Third World contexts as well as original in depth empirical research from Amritsar a city in North West India this book offers an analysis of the withdrawal of state housing provision It develops and applies a unique model based on social status to analyze the new routes of access to housing and land by the urban poor Its conclusions argue that these new privatization policies largely rely upon already existing informal and self help settlements which continue to attract the poor and to be the largest housing providers in many cities thus providing a ready made safety net for such policies The inter linkages between the private state and the public market make up a highly diversified and complex picture of shelter arrangements being accessed by the poor which is reflected in the social differentiation and increasingly stratified housing market The book argues that these partnership policies therefore have long term implications upon social patterns of inclusion and exclusion which must be addressed **New Planning Histories** Lauren Andres,Yasminah Beebeejaun,Yvonne Rydin,2025-08-17 This book brings

new scholarship to students on the origins and development of planning thoughts theories policies institutions and practices outlining how these have shaped planning as a state and professional activity It showcases the work of leading scholars working to develop new histories of planning giving particular attention to the impact of colonisation and its approach to race which has significantly impacted planning processes as well as to the importance of women and people of colour as significant actors in the development of planning policy and practices The chapters bring a much needed global and comparative perspective including views from the Global South and from countries where planning remains an under resourced and under recognised profession This is an essential resource for advanced undergraduate and graduate students in planning architecture and urban studies

Colonias and Public Policy in Texas and Mexico Peter M. Ward,2010-01-01 Today in Texas over 1500 colonias in the counties along the Mexican border are home to some 400 000 people Often lacking basic services such as electricity water and sewerage fire protection policing schools and health care these irregular subdivisions offer the only low cost housing available to the mostly Hispanic working poor This book presents the results of a major study of colonias in three transborder metropolitan areas and uncovers the reasons why colonias are spreading so rapidly Peter Ward compares Texas colonias with their Mexican counterparts many of which have developed into fully integrated working class urban communities He describes how Mexican governments have worked with colonia residents to make physical improvements and upgrade services a model that Texas policymakers can learn from Ward asserts Finally he concludes with a hard hitting checklist of public policy initiatives that need to be considered as colonia housing policy enters its second decade in Texas
