Energy Abstracts for Policy Analysis , 1983-07 Communicating Environmental Patriotism Anne Marie Todd, 2013-06-07 Environmental patriotism the belief that the national environment defines a country s greatness is a significant strand in twentieth century American environmentalism This book is the first to explore the history of environmental patriotism in America through the intriguing stories of environmental patriots and the rhetoric of their speeches and propaganda The See America First movement began in 1906 with the aim of protecting and promoting the landscapes of the American West In 1908 Gifford Pinchot and President Theodore Roosevelt hosted the White House Conservation Conference to promote the wise use of natural resources for generations of Americans In 1912 Pittsburgh s smoke investigation condemned the effects of coal smoke on the city s environment In World War II a massive propaganda effort mobilized millions of Americans to plant victory gardens to save resources for the war abroad While these may not seem like crucial moments for the American environmental movement this new history of American environmentalism shows that they are linked by patriotism The book offers a provoking critique of environmentalists communication strategies and suggests patriotism as a persuasive hook for new ways to make environmental issues a national priority This original research should be of interest to scholars of environmental communication environmental history American history and environmental philosophy Communities, Development, and Sustainability across Canada John T. Pierce, Ann Dale, 2011-11-01 What is a sustainable community The pressing need to answer this simple question is what prompted John Pierce and Ann Dale to gather the essays in this volume Communities Development and Sustainability across Canada is a timely synthesis of work on how Canadian communities can

achieve sustainable development It bridges the gap between theory and praxis and brings together academics policy makers and community activists all of whom have argued for increased local participation in sustainable community development Communities have become the weak link in efforts to refashion relations between the environment and the economy The goal of this book is not simply to describe problems but also to suggest answers not simply to offer theory but also to promote action so that Canadian communities can better achieve sustainable development The twelve essays are organized into four sections Vision Connections Action and Assessing Progress The first and last sections discuss local sustainable development within the context of increasing globalization The second section approaches sustainable development from the perspective of social evolution and urban systems The third section the heart of the book is comprised of three community case studies an assessment of the Pacific salmon fishery and four general discussions of sustainable development The conclusion reiterates the need to make communities stronger links in sustainable development The message of Communities Development and Sustainability across Canada is clear it is time for communities themselves to act if they are to achieve sustainable development This provocative and persuasive book will prove to be a valuable guide to taking the first steps

examines how the automobile has ravaged America's cities and landscape and how we can fight back. The automobile was once seen as a boon to American life, eradicating the pollution caused by horses and granting citizens new levels of personal freedom and mobility. But it was not long before the servant became the master: public spaces were designed to accommodate the automobile at the expense of the pedestrian; mass transportation was neglected, and the poor, unable to afford cars, saw their access to jobs and amenities worsen. Now even drivers themselves suffer as cars choke the highways and pollution and congestion have replaced the fresh air of the open road. Today our world revolves around the car: as a nation, we spend eight billion hours a year stuck in traffic. In *Asphalt Nation*, Jane Holtz Kay effectively calls for a revolution to reverse our automobile dependency. Citing successful efforts in places from Portland, Maine, to Portland, Oregon, Kay shows us that radical change is not impossible by any means. She demonstrates that there are economic, political, architectural, and personal solutions that can steer us out of the mess. *Asphalt Nation* is essential reading for everyone interested in the history of our relationship with the car and in the prospect of returning to a world of human mobility.

Technology Choice Kelvin W. Willoughby, 2019-07-09. This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice, primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments.
