Tropical Rainforests and Agroforests under Global Change Teja Tscharntke, Christoph Leuschner, Edzo Veldkamp, Heiko Faust, Edi Guhardja, Arifuddin Bidin, 2010-02-04 not only for land use systems that depend on the regular supply of rain or irrigation water but also for the future development of natural rainforests as drought stress has been shown to affect tree growth and species composition in old growth forests Wright 1991 Walsh and Newbery 1999 Engelbrecht et al 2007 A drought experiment conducted in a cacao agroforestry plantation showed that this plantation was surprisingly resilient to an induced drought of more than a year Schwendenmann et al 2009 However droughts can have a strong impact on household incomes from agriculture they strongly affect the vulnerability to poverty and thus have to be analyzed as important exogenous shocks to households forcing them to adjust their behaviour and develop strategies to cope with these problems The stability of rainforest margins is a critical factor in the protection of tropical rainforests Tscharntke et al 2007 At present however rainforest margins in many parts of the tropics are far from stable both in socioeconomic and in ecological terms For example protected areas may attract

rather than repel human settlement which may be due to international donor investment in national conservation programs Wittemeyer et al 2008 An alternative hypothesis is that protected areas might be compromised if leakage takes place that is if impacts that would take place inside the restricted area are displaced to a nearby undisturbed area Ewers and Rodrigues 2008

A Magic Web ,2016-03-08 The tropical forest of Panama's Barro Colorado Island is a luxuriant community of plants and animals pulsating with life and offering an astonishing view of nature's myriad processes What does the forest look like How do the activities of the forest's plants and animals create a community In *A Magic Web* photographer Christian Ziegler and evolutionary biologist Egbert Giles Leigh Jr invite readers to enter the marvelous world of Barro Colorado Island This book is a unique combination of spectacular photography and clear authoritative text written by an active scientist who has spent half a lifetime trying to understand the tropical forest Luscious photographs of the forest reveal the wonderful diversity of its inhabitants and show many of the activities that give it its character and lend structure to its community Drawing on decades of work on Barro Colorado Island Egbert Leigh explains how the forest works how plants and animals compete with but also depend on each other how the solitary lives of cats contrast with the intricately organized lives of armies of ants the variety of ways plants struggle for a place in the sun and how these plants attract animals to pollenate their flowers Finally the book shows the importance of tropical forests to the people living near them why they matter to the world at large what we can learn from them and how they differ from temperate zone forests Full of stunning full color photographs accompanied by clear and accessible text *A Magic Web* is a must for anyone planning to visit a tropical forest and for all those who wish they could
