French Drawings, XVI-XIX Centuries Gillian Kennedy, Anne Thackray, Courtauld Institute Galleries, 1991 French Drawings XVI XIX Centuries is a fully illustrated catalogue of fifty French drawings from the sixteenth to the early nineteenth centuries drawn from the Witt collection at the Courtauld Institute Galleries Instead of a conventional concentration on a particular school chronological period or type of subject matter the keynote of the collection is variety variety of function style and technique The selection of works in this book is intended to reflect that variety and to highlight the remarkable richness of three centuries of French drawings

The Learned Draftsman Édouard Kopp, 2017-01-10 The celebrated French artist Edme Bouchardon 1698 1762 is primarily known as a sculptor today but his contemporaries widely lauded him as a draftsman as well Talented highly innovative and deeply invested in the medium Bouchardon made an important contribution to the European art and culture of his time and in particular to the history of drawing Around two thousand of his drawings survive most of which bear no relation conceptual or practical to his sculpture yet remarkably little scholarly attention has been paid to this aspect of his oeuvre This is the first book length work devoted to the artist s draftsmanship since 1910 Ambitious in scope this volume offers a compelling narrative that effectively covers four decades of Bouchardon s activity as a draftsman from his departure for Rome in 1723 as an aspiring student to his death in Paris in 1762 by which time he was one of the most renowned artists in Europe His accomplished and dynamic style is analyzed and copiously illustrated in a series of five interrelated chapters that serve as case studies each of which focuses on a coherent group of drawings from a particular period of Bouchardon s career
