technological innovation prayer and spiritual experimentation and the beauty of holiness for a brave new world Shaped by the tensions and anxieties of the modern era and powerfully expressed in the space and material culture of faith the architecture presented here creates a set of new turning points in the history of the built environment Architecture Post Mortem Donald Kunze, David Bertolini, Simone Brott, 2016-04-15 Architecture Post Mortem surveys architecture's encounter with death decline and ruination following late capitalism As the world moves closer to an economic abyss that many perceive to be the death of capital contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage naked to all Architecture is not irrelevant to fiscal and political contagion as is commonly believed it is the victim and penetrating analytical agent of the current crisis As the very apparatus for modernity's guilt and unfulfilled drives modernity's debt architecture is that ideological element that functions as a master signifier of its own destruction ordering all other signifiers and modes of signification beneath it It is under these conditions that architecture theory has retreated to an Alamo of history a final desert outpost where history has been asked to transcend itself For architecture's hoped-for utopia always involves an apocalypse This timely collection of essays reformulates architecture's relation to modernity via the operational death drive architecture is but a passage between life and death This collection includes essays by Kazi K Ashraf David Bertolini Simone Brott Peggy Deamer Didem Ekici Paul Emmons Donald Kunze Todd McGowan Gevork Hartoonian Nadir Lahiji Erika Naginski and Dennis Maher **Topophilia and Topophobia** Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat which have been coined by discerning modern thinkers as topophilia and topophobia Whilst such affiliations with the topos our manmade as well as natural habitat have been traced back to antiquity a wide range of twentieth century cases are studied here and reflected upon by dwelling on this framework The book provides a timely reminder that the qualitative aspects of the topos sensual as well as intellectual should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the millennium Topophilia and Topophobia offers speculative and historical reflections on the human habitat of the century that has just passed authored by some of the world's leading scholars and architects including Joseph Rykwert Yi Fu Tuan Vittorio Gregotti and Jean Louis Cohen Human habitats ranging broadly from the cities of the twentieth century highbrow modern architecture both in Western countries and in Asia to non architect planner designed vernacular settlements and landscapes are reviewed under the themes of topophilia and topophobia across the disciplines of architecture landscape studies philosophy human geography and urban planning *Reading Kenneth Frampton* Gevork Hartoonian, 2022-05-10 This book focuses on the first edition of Kenneth Frampton's *Modern Architecture A Critical History* published in 1980 It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton's historiography of modern architecture It explores selected

themes in line with Frampton's many faceted contribution certain aspects of which can be noted between the lines of his ongoing criticism of the present day architecture which inevitably lead us to a critical understanding of the past the modernity of architecture's contemporaneity The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980-2020 The book elucidates how Frampton's critical presentation of the history of modern movement architecture and the book's classificatory mode periodization contribute to our understanding of the contemporaneity of architecture today

Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry, 2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history

Olsen, 2012-07-30 Phenomenal A must read for us who desire to topple the dictatorship of relativism and culture of death and replace it with the only alternative The Imaginative Conservative Especially concerned with the public nature of religion historian Glenn W Olsen author of *Christian Marriage A Historical Study* and *On the Road to Emmaus* The Catholic Dialogue with American and Modernity sets forth an exhaustively researched and persuasive account of how religion has been reshaped in the modern period The Turn to Transcendence traces both the loss of transcendence and attempts to recover it while making its own proposals Neither reactionary nor modernist it questions how under conditions of modern life some form of the sacred and some form of the secular might both flourish at the same time But it also provides a warning that a religion unable to maintain itself with its own overt architecture language and calendars against an enveloping secular culture is destined for oblivion Glenn Olsen s book could hardly be more pivotal or insightful Confronting the growing amnesia regarding culture s religious origin and transcendent purpose Olsen proves both a masterful cartographer of modernity and a visionary of a culture that encourages and enables us to seek beyond ourselves Carl A Anderson Supreme Knight of the Knights of Columbus A brilliant book It rests on an amazing amount of scholarship that is wide ranging in history literature art science music theology and philosophy James Hitchcock professor of history St Louis University
