turn of the century has been a moment of rapid urbanization. Much of this urban growth is taking place in the cities of the developing world and much of it in informal settlements. This book presents cutting edge research from various world regions to demonstrate these trends. The contributions reveal that informal housing is no longer the domain of the urban poor; rather, it is a significant zone of transactions for the middle class and even transnational elites. Indeed, the book presents a rich view of urban informality as a system of regulations and norms that governs the use of space and makes possible new forms of social and political power. The book is organized as a transnational endeavor. It brings together three regional domains of research: the Middle East, Latin America, and South Asia, that are rarely in conversation with one another. It also unsettles the hierarchy of development and underdevelopment by looking at some First World processes of informality through a Third World research lens.

Robert Redfield and the Development of American Anthropology Clifford Wilcox, 2006-01-01

Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students, *Robert Redfield and the Development of American Anthropology* traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society. Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory. Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development.
