Love And Other Near Death Experiences:

Love and Other Near-Death Experiences Mil Millington, 2006-02-14 Hello My name is Robert and I haven't been dead for sixty three days now If he hadn't bought those crummy towels Rob would be six feet under But his poor shopping sense accidentally set off a convoluted chain of events that meant he lived when all those others died in the pub explosion Okay maybe it wasn't the ugly towels that saved his life Perhaps it was some other random action some other small movement that was the utterly trivial yet vitally important factor And that's the real problem Now with his wedding fast approaching Rob suddenly finds himself paralyzed with indecision about Every Little Thing He just can't be sure which seemingly innocuous choice will mean the difference between life and death Should he wash the fork or the knife first Should he step out of the shower with his left leg or his right leg Red sweater or blue One thing is certain His fiancée Jo is at her wits end To save his relationship and his sanity Rob embarks on a quest to find out why he's still breathing When he meets up with others who have had similar lifesaving near misses he figures the answer must be close But fate may just catch them yet for Rob's search to understand why he's still alive might well turn out to be the very thing that kills them all Filled with the barbed and sparkling dialogue that made *Things My Girlfriend and I Have Argued About* a cult hit Mil Millington's *Love and Other Near Death Experiences* is a hilarious existential romantic comedy about second guesses and second chances **Not Quite Dead**

Mil Millington, 2006 Rob Garland is getting married in two months Oddly however this is the least of his problems More vexing than the seating arrangements the choice of wedding stationery more even than the savagely obscene expense of everything is the fact that Rob should be dead and he knows it Faced with an ultimatum from his girlfriend to either sort himself out or call the wedding and the whole relationship off he sets about trying to come to terms with how it is that somehow he's still inexplicably breathing After pouring his heart out to the listeners on his late night radio jazz show he soon finds himself teamed up with others who really ought not to be alive but who for random meaningless and frankly stupid reasons unaccountably are And that's when things become yet more worrying because it turns out that their search to understand why they've each remained oddly alive might very well end up killing them all *Love death religious beliefs existential angst Love and Other Near Death Experiences* is a jackknifing comedy about those things which should be no laughing matter First Dates & Other Near-Death Experiences

Fran Preston, Swipe right spiral left From the paralysing panic of what to wear to the emotional landmines of small talk Fran Preston has been through the first date wringer and lived to overshare about it *First Dates Other Near Death Experiences* is a warm hilarious and painfully honest guide to surviving the weird wonderful and wildly unpredictable world of modern dating Packed with cautionary tales unfiltered advice and just enough hopeful realism to keep you going this isn't a guide to finding the one it's a guide to staying sane while you look Whether you're freshly single perpetually swiping or just trying to navigate the minefield of romantic small talk without breaking into a stress rash Fran's here to help you laugh through the cringe Perfect for anyone who's ever left a date via the

The Soul's Upward Yearning Robert Spitzer, S.J., Ph.D., 2015-10-03 Western culture has been moving away from its Christian roots for several centuries but the turn from Christianity accelerated in the 20th century At the core of this decline is a loss of a sense of our own transcendence Scientific materialism has so seriously impacted our belief in human transcendence that many people find it difficult to believe in God and the human soul This anti transcendent perspective has not only cast its spell on the natural sciences psychology philosophy and literature it has also negatively impacted popular culture through the writings of Richard Dawkins Daniel Dennett and many others The warning signs of this loss of transcendence have been expressed by thinkers as diverse as Carl Jung psychiatrist Mircea Eliade historian of religion Gabriel Marcel philosopher C S Lewis and J R R Tolkien These warnings were validated by a 2004 study in the American Journal of Psychiatry which showed that the absence of religion alone was responsible for a marked increase in suicide rates sense of meaningless substance abuse separation from family and other psychiatric problems Thus the loss of transcendence is negatively affecting not only individuals sense of happiness dignity ideals virtues and destiny but also the culture Ironically the evidence for transcendence is greater today than in any other period in history The problem is this evidence has not been compiled and propagated Fr Spitzer s book provides a bright light in the midst of this cultural darkness by presenting both traditional and contemporary evidence for God and a transphysical soul from several major sources He also shows how human consciousness and intelligence is completely special and cannot be replicated by artificial intelligence or animal consciousness We are transcendent beings with souls capable of surviving bodily death self reflective beings aware of perfect truth love goodness and beauty We are beings with an unrestricted capacity to know and create science law culture art music literature and so much more The evidence reveals that we have the dignity of being created in the very image of God and if we underestimate it we will undervalue one another underlive our lives and underachieve our destiny This work is the most comprehensive treatment of human transcendence available today

AI Explains: Near Death Experiences Alexis Piani, 2025-06-07 Imagine standing at the very edge of life your body failing yet your consciousness feels clearer and more expansive than ever before For millions worldwide this isn t a hypothetical scenario but a profound reality they experienced and returned from These are Near Death Experiences NDEs subjective events reported by individuals who survive brushes with death often involving striking common elements like leaving the body journeying through a tunnel towards a brilliant light encountering deceased loved ones and undergoing a panoramic review of their life These aren t mere dreams or hallucinations survivors consistently describe them as intensely real often more vivid than ordinary waking consciousness occurring during periods when medical science suggests awareness should be impossible This book delves into the heart of this extraordinary phenomenon moving beyond anecdote to explore the rich tapestry of NDE accounts and the rigorous scientific inquiry they have inspired We trace the echoes of these experiences through history and across cultures revealing that humanity has grappled with encounters at life s threshold for millennia We then

turn to the scientific laboratory and the clinical setting examining the physiological and psychological theories proposed to explain NDEs from oxygen deprivation and neurochemical surges to dissociation and expectation Yet we don't shy away from the most challenging aspects including compelling reports of individuals accurately perceiving external events while clinically unconscious such as the widely discussed case of Pam Reynolds whose detailed observations during deep hypothermic cardiac arrest continue to puzzle researchers As one large prospective study found 18% of cardiac arrest survivors reported some recollection of the period of clinical unconsciousness a significant finding that underscores the reality and prevalence of these experiences even under extreme physiological conditions *AI Explains Near Death Experiences* offers a comprehensive balanced exploration synthesizing subjective narratives with scientific data and philosophical considerations It examines the profound and often permanent aftereffects reported by survivors from a diminished fear of death to heightened spirituality and a radical shift in values and explores the complex process of integrating such a transformative experience back into everyday life This book is for anyone curious about the mysteries of consciousness the nature of death and the potential scope of human awareness Whether you are a skeptic seeking scientific explanations a believer exploring spiritual possibilities a survivor grappling with your own experience or simply someone fascinated by the profound questions NDEs raise about what it means to be alive you will gain a deeper more nuanced understanding of this compelling phenomenon that sits at the intersection of science philosophy and the enduring human quest for meaning

Near-Death Experiences John Martin Fischer, Benjamin Mitchell-Yellin, 2016-05-02 *Near Death Experiences* gives an account of the profound meaning and striking transformative effects that near death experiences engender They argue that the integrity of scientific inquiry is compatible with genuine understanding of the significance of human spirituality

Moral Development and Reality John C. Gibbs, 2019-04-04 *Moral Development and Reality* explores the nature of moral development human behavior and social interconnections The exploration elucidates the full range of moral development from superficial perception to a deeper understanding and feeling through social perspective taking By comparing contrasting and going beyond the key theories of preeminent thinkers Lawrence Kohlberg Martin Hoffman and Jonathan Haidt John C Gibbs tackles vital questions What exactly is morality and its development Can the key theoretical perspectives be integrated What accounts for prosocial behavior and how can we understand and treat antisocial behavior Does moral development including moments of moral inspiration reflect a deeper reality This fourth edition of *Moral Development and Reality* is thoroughly updated refined and expanded A major addition considers Paul Bloom's important challenge to Hoffman's theory This book will have broad appeal across academic and applied disciplines in social and developmental psychology education the helping professions and human development Complete with case studies and chapter questions it serves especially well as a text in advanced undergraduate and graduate courses in social and developmental psychology education the helping professions and human development

Near-Death Experience in Indigenous Religions Gregory Shushan,2018-07-03 Near death experiences are known around the world and throughout human history They are sometimes reported by individuals who have revived from a period of clinical death or near death and they typically feature sensations of leaving the body entering and emerging from darkness meeting deceased friends and relatives encountering beings of light judgment of one's earthly life feelings of oneness and reaching barriers only to return to the body Those who have NDEs almost invariably understand them as having profound spiritual or religious significance In this book Gregory Shushan explores the relationship between NDEs shamanism and beliefs about the afterlife in traditional indigenous societies in Africa North America and Oceania Drawing on historical accounts of the earliest encounters with explorers missionaries and ethnologists this study addresses questions such as Do ideas about the afterlife commonly originate in NDEs What role does culture play in how people experience and interpret NDEs How can we account for cross cultural similarities and differences between afterlife beliefs Though NDEs are universal Shushan shows that how they are actually experienced and interpreted varies by region and culture In North America they were commonly valorized and attempts were made to replicate them through shamanic rituals In Africa however they were largely considered aberrational events with links to possession or sorcery In Oceania Micronesia corresponded more to the African model while Australia had a greater focus on afterlife journey shamanism and Polynesia and Melanesia showed an almost casual acceptance of the phenomenon as reflected in numerous myths legends and historical accounts This study examines the continuum of similarities and differences between NDEs shamanism and afterlife beliefs in dozens of cultures throughout these regions In the process it makes a valuable contribution to our knowledge about the origins of afterlife beliefs around the world and the

The Light Shines On in the Darkness Robert Spitzer, 2017-06-20 Why would an all loving God allow suffering Are not suffering and love opposed to one another Does suffering have any meaning or benefit Is there any objective evidence for God for a soul that will survive bodily death for the resurrection of Jesus Who is God anyway benevolent and loving or angry and retributive Fr Robert Spitzer S J gives a comprehensive response to these questions and many others explaining the contemporary evidence for God the soul and the resurrection He discusses how God uses suffering to lead us to compassion for others and eternal life He also shows how the Holy Spirit guides us through times of suffering toward our salvation explaining the signs and the interior movements that reveal the Spirit s actions Fr Spitzer not only addresses the perplexing questions associated with suffering but teaches us how to suffer well He points out some of the most common mistakes people make when trying to interpret God s motives for allowing or alleviating suffering He demonstrates why suffering in combination with love is one of the most powerful motivating agents for personal cultural and societal development

God So Loved the World Robert Spitzer, 2016-03-10 In this volume the brilliant Fr Spitzer probes in detail the major

question that if an intelligent Creator God manifest in logical proofs scientific evidence and near death experiences who is the source of our desire for the sacred and the transcendental desires for truth love goodness and beauty would want to reveal himself to us personally and ultimately He then shows this is reasonable not only in light of our interior experience of a transcendent Reality but also that a completely intelligent Reality is completely positive implying its possession of a completely positive virtue namely love defined as agape This leads to the question whether God might be unconditionally loving and if he is whether he would want to make a personal appearance to us in a perfect act of empathy face to face After examining the rational evidence for this he reviews all world religions to see if there is one that reveals such a God an unconditionally loving God who would want to be with us in perfect empathy This leads us to the extraordinary claim of Jesus Christ who taught that God is Abba the unconditionally loving Father Jesus claims go further saying that He is also unconditional love and that his mission is to give us that love through an act of complete self sacrifice He also claims to be the exclusive Son of the Father sent by God to save the world and the one who possesses divine power and authority The rest of the book does an in depth examination of the evidence for Jesus unconditional love of sinners his teachings his miracles and his rising from the dead As well as the evidence for Jesus gift of the Holy Spirit that enabled his disciples to perform miracles in his name and evidence for the presence of the Holy Spirit today If this strong evidence convinces us to believe that Jesus is our ultimate meaning and destiny and desire His saving presence in our lives that evidence should galvanize the Holy Spirit within us to show that Jesus is Lord and Savior the way the truth and the life And our faith in him will transform everything we think about our nature dignity and destiny and how we live endure suffering contend with evil and treat our neighbor

The Science of Near-Death Experiences John C. Hagan, 2017-01-30 What happens to consciousness during the act of dying The most compelling answers come from people who almost die and later recall events that occurred while lifesaving resuscitation emergency care or surgery was performed These events are now called near death experiences NDEs As medical and surgical skills improve innovative procedures can bring back patients who have traveled farther on the path to death than at any other time in history Physicians and healthcare professionals must learn how to appropriately treat patients who report an NDE It is estimated that more than 10 million people in the United States have experienced an NDE Hagan and the contributors to this volume engage in evidence based research on near death experiences and include physicians who themselves have undergone a near death experience This book establishes a new paradigm for NDEs *The Transformative Power of Near-Death Experiences* Dr. Penny Sartori, Kelly Walsh, 2017-11-14 An enthralling study of the far reaching positive effects of Near Death Experiences a well written and thought provoking book Anita Moorjani author of *Dying to Be Me* Near death experiences NDEs are often transformative not only on an individual level but on a collective level too This book contains a selection of inspiring stories from ordinary people whose extraordinary experiences have changed the course and direction of their lives opening each and every one of them to the power of divine love Recent years

have seen a dramatic change of attitude towards NDEs Unfortunately the ongoing debates about NDEs have detracted greatly from their transformational effects and how empowering they can be for the whole of mankind For those who experience them NDEs often instill the knowledge that we are all interconnected and part of one great whole This book aims to inspire people from all walks of life creeds cultures and faiths to the transformational power of the message of NDEs and to show how the love experienced during the NDE has the capacity to heal minds bodies and souls

Toward More Family-Centered Family Sciences Howard M. Bahr, Kathleen S. Bahr, 2009-03-16 Much academic writing on families reflects the ideal of non involvement and distanced subject matter Toward More Family Centered Family Sciences suggests that the family sciences in their effort to be scientific have perpetuated this distance between researcher and subject to the detriment of both The authors argue that family and kinship ties are transcendent ties boundary crossing in numerous ways They place an emphasis on family love in contrast and in addition to romantic love and criticize current approaches for neglecting the importance of transcendent concepts such as love commitment respect and sacrifice in the development and well being of family structures Drawing from insights both inside and outside of academia the authors seek to reincorporate transcendent concepts into the study of the family as a unit of society They argue for a more collaborative family centered family science and offer recommendations for how family researchers might work to change the scientific monologue about families to a systemic dialogue with families
