Love Canal My Story:

Love Canal Richard S. Newman, 2016-04-12 A history of the Love Canal region from the nation's founding and the utopian city planned for the Niagara area to the building of the region's chemistry industry to the environmental disaster at Love Canal and its aftermath

Histories of the Dustheap Stephanie Foote, Elizabeth Mazzolini, 2012-10-05 An examination of how garbage reveals the relationships between the global and the local the economic and the ecological and the historical and the contemporary Garbage considered both materially and culturally elicits mixed responses Our responsibility toward the objects we love and then discard is entangled with our responsibility toward the systems that make those objects Histories of the Dustheap uses garbage waste and refuse to investigate the relationships between various systems the local and the global the economic and the ecological the historical and the contemporary and shows how this most democratic reality produces identities social relations and policies The contributors first consider garbage in subjective terms examining toxic autobiography by residents of Love Canal the intersection of public health and women's rights and enviroblogging They explore the importance of place with studies of post Katrina soil contamination in New Orleans e waste disposal in Bloomington Indiana and garbage on Mount Everest And finally they look at cultural contradictions as objects hover between waste and desirability examining Milwaukee's efforts to sell its sludge as fertilizer the plastics industry's attempt to wrap plastic bottles and bags in the mantle of freedom of choice and the idea of obsolescence in the animated film The Brave Little Toaster Histories of the Dustheap offers a range of perspectives on a variety of incarnations of garbage inviting the reader to consider garbage in a way that goes beyond the common buy green discourse that empowers individuals while limiting environmental activism to consumerist practices

Paradise Falls Keith O'Brien, 2022-04-12 The staggering story of an unlikely band of mothers in the 1970s who discovered Hooker Chemical's deadly secret of Love Canal exposing one of America's most devastating toxic waste disasters and sparking the modern environmental movement as we know it today Propulsive A mighty work of historical journalism A glorious quotidian thriller about people forced to find and use their inner strength The Boston Globe Lois Gibbs Luella Kenny and other mothers loved their neighborhood on the east side of Niagara Falls It had an elementary school a playground and rows of affordable homes But in the spring of 1977 pungent odors began to seep into these little houses and it didn't take long for worried mothers to identify the curious scent It was the sickly sweet smell of chemicals In this propulsive work of narrative storytelling NYT journalist Keith O'Brien uncovers how Gibbs and Kenny exposed the poisonous secrets buried in their neighborhood The school and playground had been built atop an old canal Love Canal it was called that Hooker Chemical the city's largest employer had quietly filled with twenty thousand tons of toxic waste in the 1940s and 1950s This waste was now leaching to the surface causing a public health crisis the likes of which America had never seen before and sparking new and specific fears Luella Kenny believed the chemicals were making her son sick O'Brien braids together previously unknown stories of Hooker Chemical's deeds the local newspaperman

scientist and congressional staffer who tried to help the city and state officials who didn't and the heroic women who stood up to corporate and governmental indifference to save their families and their children. They would take their fight all the way to the top, winning support from the EPA, the White House, and even President Jimmy Carter. By the time it was over, they would capture America's imagination. Sweeping and electrifying, *Paradise Falls* brings to life a defining story from our past, laying bare the dauntless efforts of a few women who years before Erin Brockovich took up the mantle fought to rescue their community and their lives from the effects of corporate pollution and laid foundation for the modern environmental movement as we know it today. *The Environmental Case* Judith A. Layzer, Sara R. Rinfret, 2019-08-13

Answers to environmental issues are not black and white. Debates around policy are often among those with fundamentally different values, and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy. *The Environmental Case* captures the real-world complexity of creating environmental policy, and this much-anticipated Fifth Edition contains fifteen carefully constructed cases. Through her analysis, Sara Rinfret continues the work of Judith Layzer and explores the background, contributing factors, and outcomes of each case, and gives readers insight into some of the most interesting and controversial issues in U.S. environmental policymaking. *Beyond Nature's Housekeepers* Nancy C. Unger, 2012-10-05 This book highlights the unique and complex role women have played in the shaping of the American environment, from pre-Columbian Native Americans to present-day environmental justice activists.

The Poisoned City Anna Clark, 2018-07-10 Winner of The Hillman Prize for Book Journalism 2019 When the people of Flint, Michigan, turned on their faucets in April 2014, the water pouring out was poisoned with lead and other toxins. Through a series of disastrous decisions, the state government had switched the city's water supply to a source that corroded Flint's aging lead pipes. Complaints about the foul-smelling water were dismissed; the residents of Flint, mostly poor and African American, were not seen as credible even in matters of their own lives. It took eighteen months of activism by city residents and a band of dogged outsiders to force the state to admit that the water was poisonous. By that time, twelve people had died, and Flint's children had suffered irreparable harm. The long battle for accountability and a humane response to this man-made disaster has only just begun. In the first full account of this American tragedy, Anna Clark's *The Poisoned City* recounts the gripping story of Flint's poisoned water through the people who caused it, suffered from it, and exposed it. It is a chronicle of one town, but could also be about any American city all made precarious by the neglect of infrastructure and the erosion of democratic decision-making. Places like Flint are set up to fail, and for the people who live and work in them, the consequences can be fatal. *The Social and Cultural Construction of Risk* B.B. Johnson, V.T. Covello, 2012-12-06 The Social and Cultural Construction of Risk: Issues, Methods, and Case Studies Vincent T. Covello and Branden B. Johnson Risks to health, safety, and the environment abound in the world, and people cope as best they can. But before action can be taken to control, reduce, or eliminate these risks, decisions must be made about which risks are important and which risks can safely be ignored. The

challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book *Risk and Culture An Essay on the Selection of Technological and Environmental Dangers* Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance

But is it True? Aaron B. Wildavsky, 1995 Amid the chaos of questions and conflicting information Aaron Wildavsky arrives with just what the beleaguered citizen needs a clear fair and factual look at how the rival claims of environmentalists and industrialists work what they mean and where to start sorting them out

[Inventing Niagara](#) Ginger Strand, 2008-05-06 Strand reveals the hidden history of America s most iconic natural wonder Niagara Falls illuminating what it says about our history our relationship with the environment and ourselves

A Climate of Crisis Patrick Allitt, 2014-03-20 A provocative history of the environmental movement in America showing how this rise to political and social prominence produced a culture of alarmism that has often distorted the facts Few issues today excite more passion or alarm than the specter of climate change In *A Climate of Crisis* historian Patrick Allitt shows that our present climate of crisis is far from exceptional Indeed the environmental debates of the last half century are defined by exaggeration and fearmongering from all sides often at the expense of the facts In a real sense Allitt shows us collective anxiety about widespread environmental danger began with the atomic bomb As postwar suburbanization transformed the American landscape more research and better tools for

measurement began to reveal the consequences of economic success A climate of anxiety became a climate of alarm often at odds with reality The sixties generation transformed environmentalism from a set of special interests into a mass movement By the first Earth Day in 1970 journalists and politicians alike were urging major initiatives to remedy environmental harm In fact the work of the new Environmental Protection Agency and a series of clean air and water acts from a responsive Congress inaugurated a largely successful cleanup Political polarization around environmental questions after 1980 had consequences that we still feel today Since then the general polarization of American politics has mirrored that of environmental politics as pro environmentalists and their critics attribute to one another the worst possible motives Environmentalists see their critics as greedy special interest groups that show no conscience as they plunder the earth while skeptics see their adversaries as enemies of economic growth whose plans stifle initiative under an avalanche of bureaucratic regulation There may be a germ of truth in both views but more than a germ of falsehood too America s worst environmental problems have proven to be manageable the regulations and cleanups of the last sixty years have often worked and science and technology have continued to improve industrial efficiency Our present situation is serious argues Allitt but it is far from hopeless Sweeping and provocative A Climate of Crisis challenges our basic assumptions about the environment no matter where we fall along the spectrum reminding us that the answers to our most pressing questions are sometimes found in understanding the past

Culture Wars Roger Chapman,2015-03-17 The term culture wars refers to the political and sociological polarisation that has characterised American society the past several decades This new edition provides an enlightening and comprehensive A to Z ready reference now with supporting primary documents on major topics of contemporary importance for students teachers and the general reader It aims to promote understanding and clarification on pertinent topics that too often are not adequately explained or discussed in a balanced context With approximately 640 entries plus more than 120 primary documents supporting both sides of key issues this is a unique and defining work indispensable to informed discussions of the most timely and critical issues facing America today

Environmental Activism Jacqueline Vaughn,2003-01-15 A balanced presentation chronicling both the major events that sparked environmental activism and the nature of that activism in the past century Beginning with an overview of activism in the past century from 1900 to 2001 Environmental Activism A Reference Handbook puts organizations and their activities into historical context This volume offers both an American perspective and a global perspective It chronicles the major events that sparked environmental actions aligns individuals with organizations such as John Muir and the Sierra Club and presents a balanced treatment of activities in both conservative and liberal political spheres Separate chapters identify six eras of activism from 1900 to 2001 and include their characteristics issues strategies and advocates This is followed by summaries of the various types of organizations and their strategies including direct action ecoterrorism monkey wrenching as well as mainstream activity lobbying letter writing
