Both volume divided in twenty three sections all sections and chapters are most important The Textbook of Pulmonary and
Critical Care Medicine also offers a unique exposure to the problems in many parts of the world Tuberculosis the number one

TB prevention nonpharmacologic approaches and extrapulmonary tuberculosis are particularly relevant Many countries are
facing a growing burden of noncommunicable respiratory diseases They have become the second leading cause of death after
injuries and their impact on indirect costs such as loss of work and home productivity is enormous These problems are
addressed and measures of prevention such as smoking cessation are included Other special challenges including topics such
as indoor and outdoor air pollution climate change poisoning with pesticides snakebite toxicity pulmonary manifestations of
tropical infections and industrial accidents such as the tragedy seen in Bhopal Madhya Pradesh with methyl isocyanate have

malnutrition homelessness lack of education and poor access to health care Overcrowded cities and rural underdevelopment

addiction take a greater toll on the population Yes the world is flat but the terrain is filled with mountains and valleys and
local problems demand local solutions And these local problems need to be explored and presented with a scholarly
perspective The Textbook of Pulmonary and Critical Care Medicine has successfully incorporated these sociodemographic
factors into the subject matter The text is well written and the chapters are carefully referenced with subjects found in all
traditional pulmonary and critical care textbooks e g airway diseases interstitial lung disease pleural disease pulmonary

especially helpful to the practicing physician These include a section on the symptom approach to lung disease an overview
of the pharmacologic agents used to treat lung disease and a comprehensive review of methods in lung diagnosis from the
