

Zones of Life

The ocean is full of life, from huge whales to tiny creatures too small to see without a microscope. 28 broad bands of creatures are found in different zones of the ocean.

THE SUNLIT ZONE (surface to 3,300 feet)

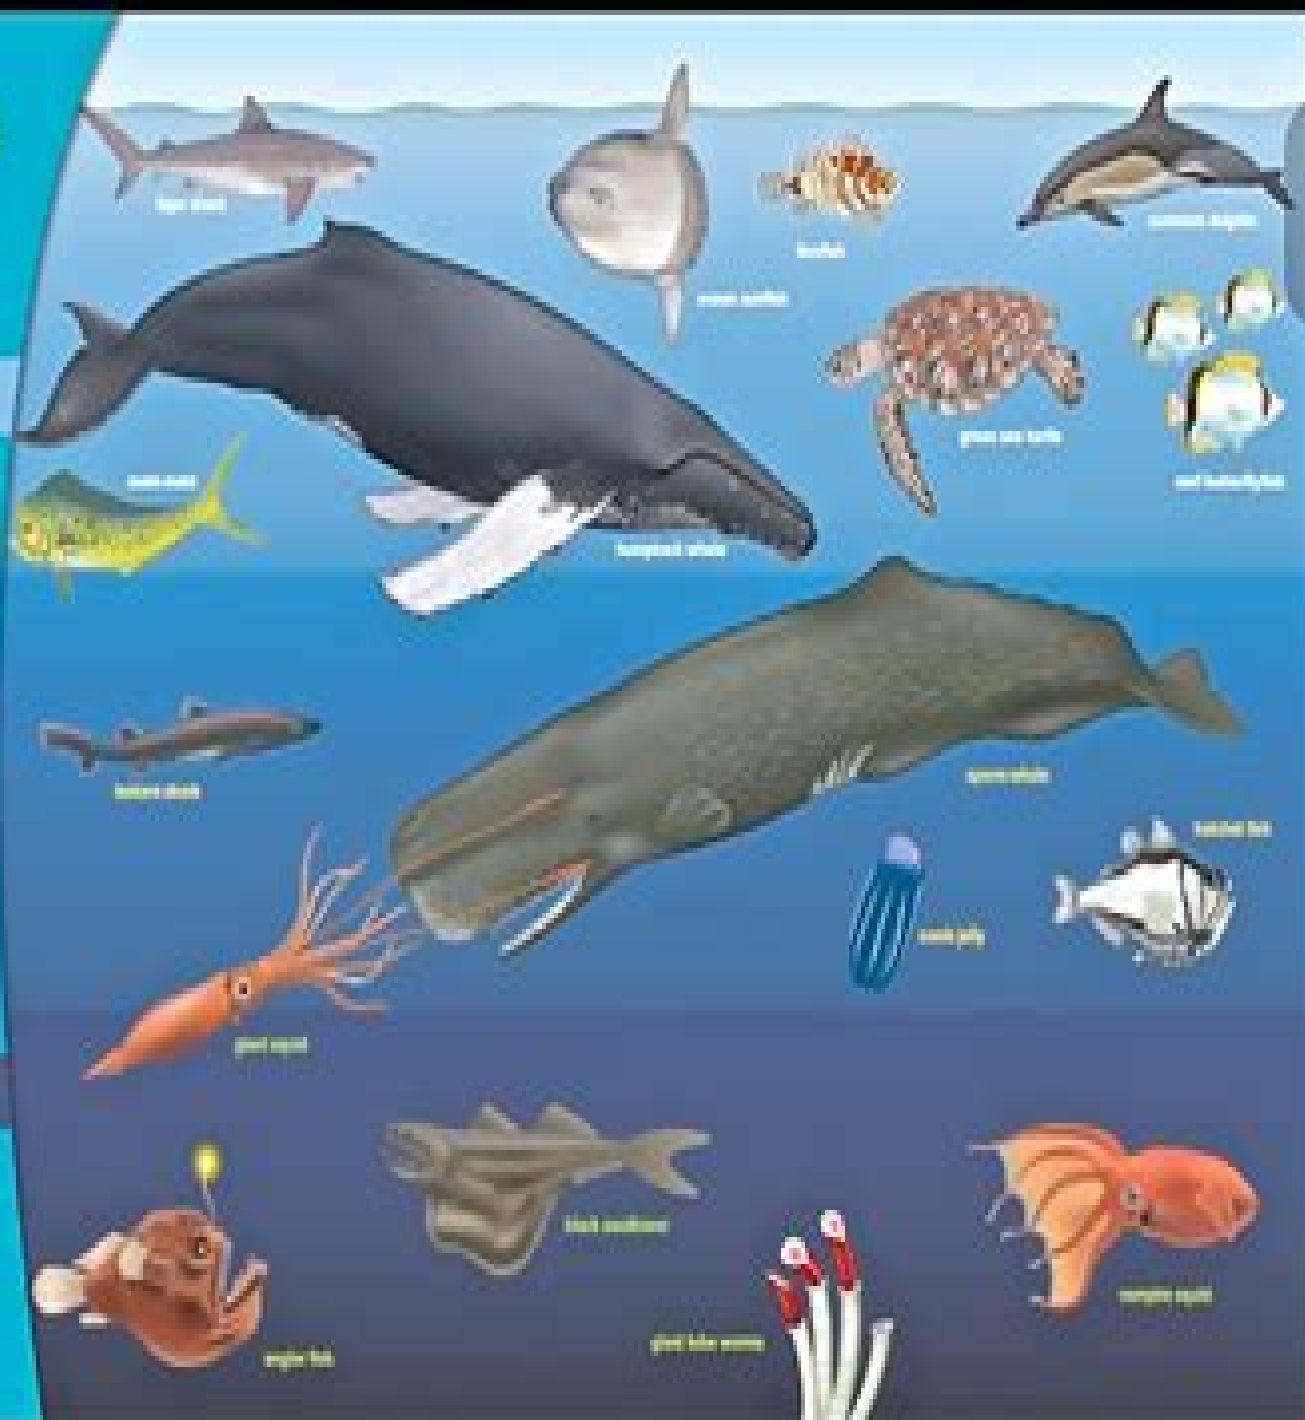

This is the brightest and warmest of the ocean. Plants and algae (24) grow just below the surface, and it is home to a huge variety of animals. It's the shallowest of the ocean, but it is also crowded with creatures from the other zones.

THE TWILIGHT ZONE (3,300 feet to 9,900 feet)

Things get darker and colder as the ocean gets deeper. Plants and algae can't survive here, and the animals in this zone are specially adapted to living in darkness. Many have big eyes to help them see. And some are bioluminescent (27)—able to make light with their bodies. They may use the light to attract prey or send signals to mates.

THE DEEPEST ZONE (9,900 feet to 36,000 feet)

Here you wouldn't want to visit the midnight zone. The temperature here can fall to freezing, and the water is pitch black. Food is scarce and fewer animals live here. Twenty percent of the water in the ocean is in this zone.
