The Lighthouse Keith McCloskey, 2014-07-01 On 26 December 1900 the vessel *Hesperus* arrived at Eilean Mor in the remote Outer Hebrides with a relief lighthouseman and fresh provisions The lighthouse had been in operation for a year but it had been noted that no light had been seen from Eilean Mor for several days The relief keeper Joseph Moore found the lighthouse to be completely deserted and a subsequent search of the island failed to reveal any sign of what had happened to the three keepers The last entry in the logbook had been made on 15 December and contained a number of strange and distressing clues as to the mental states of the men One was reported to have been crying while another had become very quiet When it was revealed that the men's oilskin coats were missing and the clock in the lighthouse had stopped theories surrounding the keepers' fates inevitably proliferated These included a giant wave washing them away murder or suicide Others favoured more esoteric explanations Eilean Mor was believed to have mystical properties In *The Lighthouse* Keith McCloskey explores this mysterious and chilling story in depth for the first time and reveals a shocking conclusion

Revealing the Inner Worlds of Young Children Robert N. Emde, Dennis P. Wolf, David Oppenheim, 2003-09-25 This book reports the work of a 20 year collaboration between a multidisciplinary group of clinicians and developmental scientists who have created and investigated a new tool to elicit and analyze children's narratives This tool is the MacArthur Story Stem Battery a systematic collection of story beginnings that are referred to as stems These stems are designed to elicit information from children about their representational worlds This method is particularly exciting because using it allows developmental psychologists and others to gain information directly from children about their emotional states and what they are able to understand and in turn to use this information to explore significant emotional differences among children This work will appeal to researchers and practitioners in developmental and clinical psychology *MacArthur's Japanese Constitution* Kyoko Inoue, 1991-02 The Japanese constitution as revised by General MacArthur in 1946 while generally regarded to be an outstanding basis for a liberal democracy is at the same time widely considered to be in its Japanese form an document which is alien and incompatible with Japanese culture Using both linguistics and historical data Kyoto Inoue argues that despite the inclusion of alien concepts and ideas this constitution is nonetheless fundamentally a Japanese document that can stand on its own This is an important book This is the most significant work on postwar Japanese constitutional history to appear in the West It is highly instructive about the century long process of cultural conflict in the evolution of government and society in modern Japan Thomas W Burkman *Monumenta Nipponica* [Legacies of the U.S.](#)

Occupation of Japan Duccio Basosi, Rosa Caroli, 2015-04-01 Six decades after the end of the occupation of mainland Japan this volume approaches the theme of the occupation's legacies. Rather than just being a matter of administrative practices and international relations, the consequences of the US occupation of Japan transcended both the seven years of its formal duration and the bilateral relations between the two countries. Rich with fresh analyses on a range of topics including transnational and comparative views on the occupation, the influence of Japan on the United States as well as the reverse, international perspectives on this odd couple and the memory of the occupation in both countries, this book provides a greater understanding of the transtemporal, transnational and transcultural legacies of one of the crucial events of the 20th century.
