McMaster University Vol 1 The Toronto Years:

University Women Sara Z. MacDonald, 2021-11-15 Bessie Scott nearing the end of her first year at university in the spring of 1890 recorded in her diary Wore my gown for first time It didn't seem at all strange to do so Often deemed a cumbersome tradition by men the cap and gown were dearly prized by women as an outward sign of their hard won admission to the rank of undergraduates For the first generations of university women higher education was an exhilarating and transformative experience but these opportunities would narrow in the decades that followed In *University Women* Sara MacDonald explores the processes of integration and separation that marked women's contested entrance into higher education Examining the period between 1870 and 1930 this book is the first to provide a comparative study of women at universities across Canada MacDonald concludes that women's higher education cannot be seen as a progressive narrative a triumphant story of trailblazers and firsts of doors being thrown open and staying open The early promise of equal education was not fulfilled in the longer term as a backlash against the growing presence of women on campuses resulted in separate academic programs closer moral regulation and barriers that restricted their admission into the burgeoning fields of science technology engineering and mathematics The modernization of higher education ultimately marginalized women students researchers and faculty within the diversified universities of the twentieth century *University Women* uncovers the systemic inequalities based on gender race and class that have shaped Canadian higher education It is indispensable reading for those concerned with the underrepresentation of girls and women in STEM and current initiatives to address issues of access and equity within our academic institutions

McMaster University, Volume 1 Charles M. Johnston, 2015-09 *The Toronto Years* is the first of three volumes relating the history of McMaster University It is not simply an institutional chronicle which lists names for the record it is a dramatic and colourful story that shows how the university grew out of earlier Baptist educational endeavours and describes its eventful first forty years spent on the Bloor Street Campus in Toronto McMaster University was established in 1887 as a trust of the Baptist constituency which helped to ensure vital and ongoing financial support but which also embroiled the school in the often bitter theological debates sweeping through the churches In the 1920s the struggle between modernism and fundamentalism threatened the university's very existence Fluctuating enrolment wartime stresses and education continually forced confrontations over the question of federation with the provincial university in Toronto Charles Johnston describes the achievements of a small group of courageous and skilful administrators amid the conflicting currents of educational and religious development in Canada during a period when universities were the targets of traditional criticisms of urban values This volume will be of interest to anyone concerned with the cultural and intellectual growth of the nation

Telling Tales Catherine Anne Cavanaugh, Randi Ruth Warne, 2000 Women played a vital role in the shaping of the west between the 1880s and 1940s Yet surprisingly little is known about their contributions or the differences sex and gender made to the opportunities and obstacles women encountered *Telling Tales*

covers a range of topics African American settlement on Vancouver Island prairie childbirth narratives and Mennonites as domestic servants are but three examples while addressing the themes of colonization settlement and community building Essays focus on women from both minority and dominant cultures and reflect the West's characteristically mixed population

Physics and the Rise of Scientific Research in Canada Yves Gingras, 1991-03-01 The teaching of engineering and a change in liberal arts curricula both stimulated by industrial growth encouraged the creation of specialized courses in the sciences By the 1890s Gingras argues trained researchers had begun to appear in Canadian universities The technological demands of the First World War and the founding in 1916 of the National Research Council of Canada NRC accelerated the growth of scientific research The Transactions of the Royal Society of Canada could no longer publish everything submitted to it because of the disproportionately large number of research papers from the fields of science In response the NRC created the Canadian Journal of Research a journal specifically dedicated to the publication of scientific research By 1930 a stable national system of scientific research was in place in Canada Following the dramatic increase in the national importance of their disciplines scientists faced the problem of social identity Gingras demonstrates that in the case of physics this took the form of a conflict between those who promoted a professional orientation necessary to compete successfully with engineers in the labour market and those mainly in the universities who were concerned with problems of the discipline such as publication internal management and awards Physics and the Rise of Scientific Research in Canada is the first book to provide a general analysis of the origins of scientific research in Canadian universities Gingras proposes a sociological model of the formation of scientific disciplines distinguishing the profession from the discipline two notions often confused by historians and sociologists of science

Varsity's Soldiers Eric McGeer, 2019-08-22 The role of Canadian universities in selecting and training officers for the armed forces is an important yet overlooked chapter in the history of higher education in Canada For more than fifty years the University of Toronto supported the largest and most active contingent of the Canadian Officers Training Corps COTC which sent thousands of officer candidates into the regular and reserve forces Based on the rich fund of documents housed in the university archives Varsity's Soldiers offers the first full length history of military training in Toronto Beginning with the formation of a student rifle company in 1861 and focusing on the story of the COTC from 1914 to 1968 author Eric McGeer seeks to enlarge appreciation of the university's remarkable contribution to the defence of Canada the place of military education in an academic setting and the experience of the students who embodied the ideal of service to alma mater and to country

Making a

Middle Class Paul Axelrod, 1990-10-01 Using a rich array of archival and quantitative sources and oral testimony from ex students across Canada Axelrod explores the characteristics and significance of university life during a trying decade He describes who went to university what they were taught how they amused themselves how they responded to the pressing political issues of the day and what became of them after graduation Axelrod argues that these students shared the aspirations of middle class communities elsewhere Dreading the prospect of downward social mobility they craved the status a university degree and professional credentials might produce Accordingly they forged an associational life on campus that challenged the control of paternalistic authorities perpetuated the values of middle class culture and helped them cope with the stresses of the time Women composed almost one quarter of the student population and faced discrimination inside and outside the classroom How they coped with this how they adapted their own expectations and how they contributed to campus and community culture are extensively discussed Through the prism of the student experience Making a Middle Class furnishes fresh insights into the social history of higher education the history of youth the history of the middle class and the history of the Depression

Canadian Churches and the First World War Gordon L. Heath, 2014-01-13 Most accounts of Canada and the First World War either ignore or merely mention in passing the churches experience Such neglect does not do justice to the remarkable influence of the wartime churches nor to the religious identity of the young Dominion The churches support for the war was often wholehearted but just as often nuanced and critical shaped by either the classic just war paradigm or pacifism s outright rejection of violence The war heightened issues of Canadianization attitudes to violence and ministry to the bereaved and the disillusioned It also exacerbated ethnic tensions within and between denominations and challenged notions of national and imperial identity The authors of this volume provide a detailed summary of various Christian traditions and the war both synthesizing and furthering previous research In addition to examining the experience of Roman Catholics English and French speaking Anglicans Presbyterians Methodists Baptists Lutherans Mennonites and Quakers there are chapters on precedents formed during the South African War the work of military chaplains and the roles of church women on the home front
