Informal Justice in Contemporary Society Dr. Lee Li-On, 2016-05-06. Drawing on an ethnographic study in a multicultural city of Arabs and Jews in Israel, this book examines the models and expressions of power implicated in discourse and conflict resolution practices in cross-cultural contemporary community. The author explores community politics expressed in daily life as a contextual background to the analysis of conflict resolution politics, exploring perspectives of state and civic stakeholders. Through case analysis and addressing the individual, organisational, and societal levels, Dr. Li-On illustrates that conflict resolution is dominated by politics, with culture, ethnicity, and identity playing a significant role. Disputing groups rely on conflict resolution to achieve contesting socio-political goals. The book explores core concerns in the field, illustrating obstacles, challenges, and opportunities confronting informal justice in contemporary communities. *Informal Justice in Contemporary Society* is motivated by the field's research-practice gap and the lack of real-world impact research in cross-cultural settings. The book contributes insights towards theory refinement and conflict resolution practice by addressing practical issues confronted by mediators in the field. This innovative research path introduces a holistic approach to the study of informal justice in social context, deploying multilevel ethnographic analysis to broaden the perspectives and understanding of conflict resolution in contemporary communities. Locally, it provides insights into conflict resolution in Israel in a mixed city of Arabs and Jews. This book belongs on the reference shelf of essential reading for educators, researchers, and practitioners in conflict resolution and social studies, including anthropological, community, legal, and cultural fields.

in the conflict management and dispute resolution field to promote more effective professional applications

Introduction to Conflict Resolution Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline's existence. Each generation of scholars has struggled with the major puzzles of their era, providing theories and solutions that meet the needs of the time, only to be pushed forward by new insights and at times totally upended by a changing world. This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field, each one tied to the historical context and events of the day. In each of these epochs, scholars and practitioners worked to understand and address the conflicts that the world was facing at that time. This book provides a framework that students will carry with them far into their careers, enriching their contributions and strengthening their voices. Rather than a didactic approach to the field, students will develop their critical analytical skills through an inductive inquiry. Students will broaden their vocabulary, grapple with argumentation, and develop critical reading skills.

Divorced from Reality Jane C. Murphy, Jana B. Singer, 2015-06-26 Over the past thirty years there has been a dramatic shift in the way the legal system approaches and resolves family disputes Traditionally family law dispute resolution was based on an adversary system two parties and their advocates stood before a judge who determined which party was at fault in a divorce and who would be awarded the rights in a custody dispute Now many family courts are opting for a problem solving model in which courts attempt to resolve both legal and non legal issues At the same time American families have changed dramatically Divorce rates have leveled off and begun to drop while the number of children born and raised outside of marriage has increased sharply Fathers are more likely to seek an active role in their children s lives While this enhanced paternal involvement benefits children it also increases the likelihood of disputes between parents As a result the families who seek legal dispute resolution have become more diverse and their legal situations more complex In *Divorced from Reality* Jane C Murphy and Jana B Singer argue that the current problem solving model fails to address the realities of today s families The authors suggest that while today s dispute resolution regime may represent an improvement over its more adversary predecessor it is built largely around the model of a divorcing nuclear family with lawyers representing all parties a model that fits poorly with the realities of today s disputing families To serve the families it is meant to help the legal system must adapt and reshape itself

Transforming Conflict through Communication in Personal, Family, and Working Relationships Peter M. Kellett, Thomas G. Matyók, 2016-11-15 A transformational approach to conflict argues that conflicts must be viewed as embedded within broader relational patterns and social and discursive structures Central to this book is the idea that the origins of transformation can be momentary situational and small scale or large scale and systemic The momentary involves shifts and meaningful changes in communication and related patterns that are created in communication between people Momentary transformative changes can radiate out into more systemic levels and systemic transformative changes can radiate inward to more personal levels This book engages this transformative framework by bringing together current scholarship that epitomizes and highlights the contribution of communication scholarship and communication centered approaches to conflict transformation in personal family and working relationships and organizational contexts The resulting volume presents an engaging mix of scholarly chapters think pieces and personal experiences from the field of practice and everyday life The book embraces a wide variety of theoretical and methodological approaches including narrative critical intersectional rhetorical and quantitative It makes a valuable additive contribution to the ongoing dialogue across and between disciplines on how to transform conflicts creatively sustainably and ethically

How Does Law Matter? Bryant G. Garth, Austin Sarat, 1998 The question of how law matters has long been fundamental to the law and society field Social science scholarship has repeatedly demonstrated that law matters less or differently than those who study only legal doctrine would have us believe Yet research in this field depends on a belief in the relevance of law no matter how often gaps are identified The essays in this collection show how law is relevant in both an instrumental and a constitutive sense as a tool to accomplish particular purposes and as an important force in shaping the everyday worlds in which we live Essays examine these issues by focusing on legal consciousness the body discrimination and colonialism as well as on more traditional legal concerns such as juries and criminal justice
