beneficiaries may still have significant additional costs including copayments coinsurance deductibles and the full cost of services that are not covered by Medicare All Medigap plans cover some percentage of Medicare's cost sharing Some plans offer additions to these basics including various combinations of greater coverage of Medicare cost sharing and care associated with foreign travel emergencies The most popular plans are the most comprehensive and cover all deductibles copayments and coinsurance not covered by Medicare Medigap generally does not cover medical treatments not covered by Medicare although it does extend coverage for certain covered services such as coverage for additional hospital days beyond the Medicare benefit limit Medigap is financed through beneficiary payments to the private insurance firms Federal law requires that Medigap insurers observe many consumer protections Consumer protections are especially strong during open enrollment which is a six month period that begins for most individuals during the month they turn 65 During this period individuals are protected against insurers refusing to sell them any Medigap policy that the insurer offers insurers setting premiums based on the individual's health and insurers imposing waiting times on the start of the policy other than a maximum of a six month waiting period for preexisting conditions Following the open enrollment period beneficiaries have other rights in limited situations such as when they move to a different state Guaranteed issue or the right to buy a plan to have the plan's premium not depend on health status and in some cases to have the plan start coverage of preexisting conditions immediately is one such right The right of guaranteed renewability is available in a wide variety of situations and genetic discrimination is forbidden Moreover Medigap insurers must pay out at least 65% and sometimes 75% of total premiums as claims to the beneficiaries Recent data show that Medigap premiums vary by states and other factors A relatively small number of insurance firms sell Medigap plans In addition Medigap beneficiaries are concentrated in certain areas of the country and are more likely to have lower incomes than those holding employer sponsored retiree health insurance The Patient Protection and Affordable Care Act P L 111 148 as amended by P L 111 152 ACA requests that the Secretary of Health and Human Services ask the National Association of Insurance Commissioners to review and revise existing standards to examine greater cost sharing for Medigap beneficiaries In addition the President's 2013 budget proposal would provide incentives to increase cost sharing One rationale for these proposals is that beneficiaries on average reduce their use of medical care following an increase in cost sharing This decrease in medical care by Medicare beneficiaries could reduce Medicare expenditures and the federal deficit On the other hand if these reductions in medical care ultimately lower health status the individuals might require more treatments or more expensive care This report provides a broad overview of Medigap insurance The report covers the history of Medigap legislation the various types of Medigap plans consumer protections awarded to Medigap beneficiaries and the requirements facing the insurance providers and the NAIC Following an empirical description of Medigap markets the report discusses proposals related to the percentages of a Medigap insurer's revenue that is returned as benefits to the policy holders and Medigap cost sharing
