Paniagua,2024-12-23 Training in multicultural issues is an area of increasing focus in medical education internationally In the United States specifically the inclusion of the topic in training programs is among the key criteria established by the Liaison Committee on Medical Education LCME for approval of schools of medicine where Standard 7 6 deals with Structural Competence Cultural Competence and Health Inequities This new textbook provides a culturally sensitive framework to address the major

elements in the LCME Standard 7 6 and to address related requirements for including multicultural issues in the curriculums of medical schools around the world

Key Features

The first book in the field to provide a framework to help approved medical schools and those in the submission process for approval in the United States to respond appropriately to Standard 7 6 in the LCME

This framework also supports the design of culturally sensitive curriculums in medical schools outside the United States

Provides specific guidelines to equip future physicians with the skills to take the culturally sensitive approaches they must use when assessing diagnosing and treating culturally diverse patients in order to ensure optimal outcomes for patients

Helps medical educators and schools to specify where and how in the curriculum students are best trained to become culturally competent and the need also to display attributions of cultural humility during clinical encounters with clients

patients

With a practical approach the book provides invaluable hands on guidance to students seeking to develop their skills knowledge and competence in this area

Additionally by specifying where and how in the curriculum students can be trained to be culturally competent the book serves as an essential reference for educators and medical schools seeking support in the development and implementation of a culturally appropriate curriculum

Handbook of Behavior Therapy in Education S.N. Elliott, F. Gresham, J.C. Witt, 2013-11-11 What do we know about behavioral analysis and intervention in educational settings Given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s it is apparent that we have had the opportunity to learn a great deal The evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent

fascination with repeatedly demonstrating the effectiveness of the new technology to a mature recognition of the complex implications of the behavioral paradigm for individuals, systems and society. Many facts now taken for granted were considered impossibilities a mere two decades ago. In her 1986 presidential address to Division 25 of the American Psychological Association, Beth Sulzer-Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy. Most educators now agree that a) everyone can learn, b) complex skills can be taught, c) precise general and durable performance can be taught and d) barriers to learning can be overcome. In addition, we would add that behavior therapy is being applied to increasingly more complex human problems such as social skill deficits, internalizing disorders and dysfunctional systems and organizations.
