The Cambridge Medieval History, Vol. 4 Z. N. Brooke, 2017-10-20 Excerpt from The Cambridge Medieval History Vol 4 The Eastern Roman Empire 717 1453 Our chief thanks are also due to Professor Bury without whose aid our task in a volume treating of Byzantine history could hardly have been accomplished He has read most of the chapters in proof and has made a number of invaluable suggestions upon them Besides contributing a summary to Chapter V he has written for us the Introduction to the volume in which he explains its general plan and defines the place of Byzantium in universal history A volume dealing with subjects which lie apart from the more frequented paths of medieval studies has laid the Editors under many obligations to specialists Professor A A Bevan has given the kindest help in the transliteration of Arabic and Professor E G Browne in that of Turkish names while Dr E H Minns

has revised the forms of names in Slavonic languages we owe much to their criticism and advice About the Publisher

What will the current global political order look like when American unipolarity ends Historically the power configurations of world political systems have been defined by four structures multipolarity tripolarity bipolarity and unipolarity These concepts inform both the formulation and the analysis of short term policies and long term grand strategies of powerful actors in the world political order and may be of profound importance to the future peace and stability of the global system The concept of nonpolarity however has never been addressed as a possible or a potential structural formulation in the nomenclature of global political systems This book provides a coherent conceptualization of nonpolarity and how diplomacy will operate in a more collective age and fits into the ongoing discussion about the nature of the political world order as we approach the end of the American century **History**

Great Powers and Geopolitical Change Jakub J. Grygiel,2007-02-01 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena Readings in Medieval History, Volume II Patrick

Nobody's Kingdom T.J. Winnifrith,2021-05-05 The Roman Byzantine and Ottoman Empires foreign invasion communism and tribal conflict these have been the realities of life in Northern Albania for centuries In this rich and comprehensive history Tom Winnifrith examines the many different elements that have shaped this independent and little known region of the Balkans He explores the fundamental division between the South of Albania and its mysterious romantic North more feudal more tribal more Catholic and more prone to Austrian and Italian influence It is also a region less affected by Greece both ancient and modern and by medieval Byzantium or the Orthodox faith Northern Albania with a terrain and climate much harsher than the south of the country has traditionally had little respect for law and authority while

its inhabitants remain in thrall to an ancient honour code the kanun demanding blood feuds and terrible revenge Nobody's Kingdom traces the history of this ruggedly beautiful region frequently disturbed by both invaders and internal strife yet retaining a distinct national identity and character From its origins in the ancient kingdom of Illyria and the Roman province of Illyricum through Byzantine and Ottoman rule the granting of Albanian independence in 1912 the rise and fall of communism to its current fragile democracy Northern Albania can be seen as a cultural crossroads especially remarkable given its mountainous and difficult landscape This book both scholarly and readable is the first modern comprehensive history of Northern Albania and is a timely and accessible introduction to a remote and inaccessible region A Syllabus for the Study of Medieval Times Lowell Joseph Ragatz, 1928
