Bondi, 1983 *Library of Congress Catalogs* Library of Congress, 1976 Learning Without a Teacher Michael
Rossman, 1974 *Multicultural Education* James A. Banks, 1977 Multicultural education is a flourishing though sometimes
controversial and increasingly contested field of study Its major aim and purpose has been described as to create equal
educational opportunities for students from diverse social racial ethnic and cultural backgrounds to help them acquire the
knowledge aptitudes and skills needed to function effectively in a pluralistic democratic society Multicultural education
draws its content concepts paradigms and theories from specialized interdisciplinary domains such as ethnic and women s
studies and from history and the social and behavioural sciences as well as by interrogating challenging and reinterpreting
the work of other established disciplines and applying it to pedagogy and curriculum development in educational settings As
academic thinking about and around multicultural education continues to develop this new title in the Routledge series Major
Themes in Education meets the need for an authoritative reference work to make sense of the field s vast literature and the
continuing explosion in research output Edited by James A Banks one of the world s leading authorities on the topic this new
Major Work brings together in four volumes the canonical and the best cutting edge scholarship The editor has drawn on the
most important and influential research from a range of countries including the UK the US South Africa Japan China and
Canada to create a one stop mini library which describes and analyses the nature scope and principal issues of global
multicultural education today Multicultural Education is fully indexed and has a comprehensive introduction newly written by
the editor which places the collected material in its historical and intellectual context It is an essential work of reference and
is destined to be valued by scholars and students as well as by educational policy makers as a vital research and pedagogic
tool *Basic Education* Gerald Lee Gutek, 1981 This publication clarifies the basic education movement by placing it in a
historical and philosophical context In many ways the basic education movement of the 1970s is part of a continuum of
similar movements in American education that have occurred with almost clocklike regularity appearing in rather regular
cycles since the 1930s First the current basic education movement that originated in the 1970s is reviewed Criticisms made
by proponents of basic education and some remedies proposed that may cure the problems believed to exist today in public
schooling are presented The Essentialist movement of the 1930s is then examined The Essentialists were a group of

professional educators who challenged the then progressive trends in American education Like today s advocates of basic education the Essentialists charged that public education despite its vast extent and heavy cost to society was appalling weak and ineffective They believed it was crucial that the curriculum be organized systematically and sequentially and that instruction stress logical chronological and causal relationships They argued that the teacher should be restored to a position of central authority in the classroom Lastly the publication discusses arguments of the educational critics of the 1950s A new educational movement called Life Adjustment Education brought about by World War II became the target for a group of educational critics The proponents of Life Adjustment Education maintained that the purpose of the schools should be broader in scope than stictly academic programs The critics perceived of the function of the school in academic terms Author RM

General Education Harry S. Broudy,1974 **The Third Wave and Education's Futures** William C. Miller,1981

This booklet describes Alvin Toffler s future society and culture and examines its potential impact on education In his book The Third Wave Toffler describes our civilization s progress through two major phases waves The First Wave began some 8 000 years ago when man became agricultural The Industrial Revolution began the Second Wave The Third Wave is just now starting The values upon which the Third Wave society is based are personal fulfillment feelings of self worth and time for leisure meaningful and stimulating work individuals who are self reliant and autonomous and a reasonable degree of security Because of education s lack of success in innovation and change many doubt our educational system can respond much less lead us into the Third Wave If education is to be valued by a Third Wave population education will have to be different It will have to be less formal expensive and wasteful and more individualized realistic humane fun and lifelong The curriculum of the future will 1 focus on preventive mental and physical health 2 create a responsive environment for learners 3 be more integrated and will be organized around major topics 4 emphasize acquisition of critical thinking and problem solving skills 5 stress the ability to locate and use resources and 6 encourage building human relationships More use will be made of interdisciplinary instructional teams often composed of specialized personnel from business industry and the professions Also there will be new organizational structures for schools Author RM

The Public Community College Glen Gabert,1981

Education for a Global Society James M. Becker,1973 **Education in Contemporary Japan** Edward R. Beauchamp,1982 Summer School John W. Dougherty,1981

A brief history of the role of summer schools in American education provides the background for a discussion of how summer school can become an integral and expanded part of our school system Summer school may be viewed as a viable alternative to retention as part of the provision of equal education for handicapped students and as an opportunity for students to strengthen basic skills The summer program however should not simply duplicate the regular program It needs to be innovative and flexible Moreover summer school can serve the needs of ambitious students by offering courses these students could not pursue during the year or by allowing some students to graduate early Talented and gifted students can take advanced or special courses that utilize community resources or are

specifically designed for them The concept of the extended school year has also yielded plans that make use of school buildings during the summer including extended summer school the trimester plan the multiple session plan and the quarter plan Whatever plan is followed summer school should receive the same administrative care and planning as the regular session Author WD *Elementary Mathematics* Francis M. Fennell, 1981 This document examines the past present and future of elementary school mathematics The impact of the modern mathematics movement in the curriculum is assessed and the factors behind the back to basics movement are analyzed The text presents factors considered to be the real basics in mathematics of the eighties based on the recommendations of the National Council of Teachers of Mathematics The view promoted is that during the coming years elementary mathematics teachers must be concerned with the logical social and psychological criteria of the elementary mathematics curriculum The neglect of any one of these criteria is seen as a shortchange in students mathematics education MP
