

SAFETY IN SPORT

All physical activity involves the risk of injury. Therefore, it is important to identify these risks and how they can be reduced.

B

BODY

Always complete a full warm-up and cool-down.

Warm-up: Perform a light aerobic activity to increase blood flow, and stretch muscles to avoid injury.

Cool-down: Gradually reduce the level of activity to help with the dispersal of lactic acid and avoid muscle stiffness.

R

RULES

Many sports have rules that are implemented to improve safety and to protect the participants.

Referees and umpires oversee sporting activities to ensure that participants adhere to the rules, which reduces the risk of injury.

E

EQUIPMENT

Equipment must be safe and in good working order. For example, do not use damaged or broken apparatus in the gymnasium.

Also, many sports use safety equipment to prevent injury – for example, post protectors in rugby.

A

ABILITY

Ability levels vary greatly in sport. Therefore, it is important to group performers of similar ability to ensure there is balanced competition.

Age, weight and skill level should be used to identify ability levels and group participants, particularly in contact activities.

K

KIT

To avoid injury in sport, it is imperative that the appropriate clothing and footwear are worn.

For example, football players must wear shin pads and studded boots whereas cricketers have to wear helmets, gloves and various other padding whilst batting.

S

SURFACE

Before a sporting activity, evaluate the environment and perform a risk assessment to ensure it is safe for the activity.

Ensure the surface is free from litter, broken glass, potholes and other potential hazards. It is also important to check that the pitch is not waterlogged, frozen or too hard.

REMEMBER

In addition to the above precautions, correct techniques must be used and coaches' instructions followed. Always be responsible for your own safety.

Zeigler Earle F. Zeigler, Earle F. Zeigler, 2010 Philosophy of Physical Activity Education Including Educational Sport is designed to help you develop an early philosophic perspective of physical activity education including educational sport In the process you will also come to understand selected aspects of the field s historical background as a developing academic field and discipline The field is called sport and physical education in the United States currently However as we move along in the 21st century it is still designated as physical and health education in Canada The term used most often to name the field worldwide is physical education and sport Despite its obvious importance there has been a gradual decline of physical activity education philosophy including educational sport within the professional curricula of physical activity educators and coaches This appears to have taken place since the adoption in the 1970s of an almost pure analytic philosophical approach to the detriment of almost any applied philosophic endeavor As you develop an understanding about your chosen life work the author hopes that you as a prospective professional educator will be stimulated to examine yourself and your beliefs more carefully than ever before If you will do this conscientiously the result will be an under girding personal philosophy that is sound consistent and logical **PE for You Teacher Resource**
