Reality Prime:

Is Present Reality Vipin Gupta, 2021-02-19 Is Present Reality The Super science of the transcendental value investigates our reality as an entity who has the power to shape the present and be the light that affirms our presence in the eternal future The transcendental value of the past is immanent within the present The present becomes the subject of scientific investigation The entity who conceived the scientifically investigable present is the super scientific factor whose reality transcends beyond the limits of science An observer behaves as a mirror image of the present and uses the light of self consciousness for illuminating the reality of the universe Without the observer's light the present of the universe is the dark matter Once the observer services the sentient light force the future of the observer is the black hole As a manager of our reality we have an option not to transform our sentient energy into a light force behaving as if we are the white star source of light for illuminating the reality of the universe Instead we may invest our energy for conceiving a different reality at any moment that thereafter constitutes the past Such unique reality is scientifically observable in the present as the illuminated matter The illuminated matter is a proportion of the present which is the dark matter Thus if an observer observes the illuminated matter as the rope it might as well be a body of atoms that eventually transforms into a body of cells That body of cells may be the reality of a snake What we observe and experience in the present is not necessarily the reality This work reveals the blockages that limit our vision's dimensionality and the solutions to be the reality that shapes the eternal present Dr Vipin Gupta has a Ph D in managerial science and applied economics from the Wharton School of the University of Pennsylvania He is a gold medalist from the Post graduate Program of the Indian Institute of Management Ahmedabad India He is a Professor of sensible management and appropriate science at the Jack H Brown College of Business and Public Administration California State University San Bernardino USA

Ideals and Reality Friedrich Ischebeck, Ravi A. Rao, 2005-11-22 Besides giving an introduction to Commutative Algebra the theory of commutative rings this book is devoted to the study of projective modules and the minimal number of generators of modules and ideals The notion of a module over a ring R is a generalization of that of a vector space over a field k The axioms are identical But whereas every vector space possesses a basis a module need not always have one Modules possessing a basis are called free So a finitely generated free R module is of the form R^n for some $n \in \mathbb{N}$ equipped with the usual operations A module is called projective iff it is a direct summand of a free one Especially a finitely generated R module P is projective iff there is an R module Q with $P \oplus Q \cong R^n$ for some n Remarkably enough there do exist nonfree projective modules Even there are nonfree P such that $P \oplus M \cong R^n$ for some m and n Modules P having the latter property are called stably free On the other hand there are many rings all of whose projective modules are free e.g. local rings and principal ideal domains A commutative ring is called local iff it has exactly one maximal ideal For two decades it was a challenging problem whether every projective module over the polynomial ring $k[X]$

Dispositional Reality Lorenzo Azzano, 2024-03-01 Dispositionalism perhaps the most popular

variant of non Humean metaphysics submits that dispositions powers or capacities are part of the furniture of the world In this book I advance an original approach to dispositionalism revolving around the notion of Dispositional Reality the novelty lies in the fact that the account unlike most alternatives on the market does not require the reification of objects facts properties nor their dispositional essences and is in fact compatible with a far more deflationary approach to dispositions while still being true to the non Humean spirit of the proposal This power metaphysics without powers allows one to dispel several puzzles in recent literature or recast them under a new light Albeit with its own peculiarities this proposal constitutes a variant of explanatory dispositionalism according to which realism about dispositions ought not to be understood as an ontological inflation but as an explanatory inversion within thenomic and modal family Some of these explanations are hereby attempted and a study of various types of non causal explanation will be provided **Poison Reality** Lord M. God and Reality Marshall Bowyer Stewart,1926 *How Real Is Reality TV?* David S. Escoffery,2014-12-03 American viewers are attracted to what they see as the non scripted unpredictable freshness of reality television But although the episodes may not be scripted the shows are constructed within a deliberately designed framework reflecting societal values The political economic and personal issues of reality TV are in many ways simply an exaggerated version of everyday life allowing us to identify perhaps more closely than

we care to admit with the characters onscreen With 16 essays from scholars around the world this volume discusses the notion of representation in reality television It explores how both audiences and producers negotiate the gulf between representations and truth in reality shows such as Survivor The Apprentice Big Brother The Nanny American Idol Extreme Makeover Joe Millionaire and The Amazing Race Various identity categories and character types found in these shows are discussed and the accuracy of their television portrayal examined Dealing with the concept of reality audience reception gender roles minority portrayal and power issues the book provides an in depth look at what we see or think we see in reality TV Instructors considering this book for use in a course may request an examination copy here *Air Force Engineering & Services Quarterly* ,1983

The Presidentialization of Politics Thomas Poguntke,Paul Webb,2007-04-27 The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered

Reality TV Susan Murray,Laurie Ouellette,2004-04-01 Survivor The Bachelor Extreme Makeover Big Brother Joe Millionaire American Idol The Osbournes It is virtually impossible to turn on a television without coming across some sort of reality programming Yet while this genre has rapidly moved from the fringes of television culture to its lucrative core critical attention has not kept pace Beginning by unearthing its historical roots in early reality shows like Candid Camera and

wending its way through *An American Family*, *Cops* and *The Real World* to the most recent crop of reality programs *Reality TV* is the first book to address the economic, visual, cultural and audience dimensions of reality television. The essays provide a complex and comprehensive picture of how and why this genre emerged, what it means, how it differs from earlier television programming and how it engages societies, industries and individuals. Topics range from the construction of televisual reality to the changing face of criminal violence on TV to issues of surveillance, taste and social control. By spanning reality television's origins in the late 1940s to its current overwhelming popularity, *Reality TV* demonstrates both the tenacity of the format and its enduring ability to speak to our changing political and social desires and anxieties. Durrell Re-read James M. Clawson,2016-06-20 Reading the twelve major novels of Lawrence Durrell this study argues for their consideration as a single major project an opus marked by themes of liminality and betweenness As major texts of mid twentieth century literature repeatedly earning nominations for the Nobel Prize Durrell s work has attracted renewed critical attention since his centenary in 2012 This study shows the thematic unity of the opus in five areas First by disrupting expectations of love and death and by fashioning plural narrators works in the opus blend notions of the subject and the object Second in their use of metafictional elements the texts present themselves as neither fiction nor reality Third their approach to place and identity offers something between the naturalistic and the human centric Fourth though the texts initial concerns are engaged with understanding the past and preparing for a future they all resolve in something like the present And fifth though the novels reject many aspects of modernism they reside nevertheless between the poles of modernism and postmodernism Shared with other writers including T S Eliot and Henry Miller as early as the 1940s Durrell s plans for his major works of fiction remained consistent through the publication of the last novel in 1985 and these plans show the need to consider the twelve major works as a unitary whole Reality ,1921 **The Real World of Ti-Airea**

Brian P. Taylor,2012-03-12 The Real World of Ti Airea is a RPG players manual like many other popular books of its genre It is a world like no other As an RPG gamer Ti Airea will have many great and new exciting things that other RPG gaming systems don t have There are unique races that s in a fantasy world many would like to play as In addition to that some also have powers and abilities that are unique to them alone There are character classes that are totally different from the normal classes that you would normally see in other gaming systems As well as the standard class types There are rules that may seem familiar to you and some that are brand new But all will make sense without very long explanations Some characters that you will see may seem to be over powered and some will seem to be too weak but once you see how they are all used you will notice that they all compliment each other to some extent Not all are good and not all are bad but they all are unique Ti Airea follows no earthly commonality because its not earth There are God s Avatars great beasts magic of course dragons There is much to do in Ti Airea places to explore ruins to find and things to fight Ti Airea has 6 huge continents five in which are explorable by land and sea and one only by air There is much more to The Real World of Ti Airea than just that So we beckon you all to come to Ti Airea to lose yourself imagine well enjoy the difference *Hyperreason* Mike

Understanding Religious Abuse and Recovery Patrick J. Knapp,2021-04-21 Currently there are at least four major identifiable perspectives on how people best understand and recover from religious abuse Both secular and faith based Christian adherents can be variously identified in each of these approaches This book examines these viewpoints and evaluates their various strengths and limitations It concludes that each perspective is helpful to the extent possible given the limitations of its respective philosophic or theological assumptions This book summarizes each viewpoint and suggests a larger contextual perspective helpful to better understand involvement in and recovery from religiously abusive environments The conclusion is an integration of the various conceptual frameworks and a different model SECURE is described that includes essential principles and practical strategies necessary for recovery from religious abuse Suggestions are made for future research and study both for academics with interest in the cultic studies and counseling fields and for various people negatively affected by religious abuse and in need of recovery **Christian Logic** Stephen

Wuest,2024-10-25 This text is about fusing logic and moral theory and is definitely from a Christian worldview It is written on a level for AP high school or at most second year college use But the text is for Christian laypeople The goals of this book include presenting modern deductive logic modern logical notation and the twenty rules of inference These describe what modern deductive logic is However orthodox Christians must go further they must be exposed to historical moral ethical ME models And they must think carefully about how to integrate Christian morality into modern logic and use this fusion to have a sound methodology to analyze modern arguments Given the popularity of logically incoherent conspiracy theories this approach to formal logic enters through the door of what historical Christians would call roughly our shared reality Also given the abundance of partial or invalid or unsound arguments that Americans encounter the analysis of arguments in this book will heavily deal with dysfunctional arguments Putting these topics together in a synthesized way in a Christian worldview results in a product that reasons across disciplines and is perhaps politically incorrect But the author is convinced that this combination of skills is what American Christians need *Metaphysics* Lukáš Novák,Daniel D. Sousedík,David Svoboda,2013-05-02 Throughout the greater part of the twentieth century both in the analytic and continental traditions metaphysics was deemed to be pass The last few decades however have witnessed a remarkable growth of interest among analytic philosophers in various traditional metaphysical topics such as modality truth causality etc which resulted in the emergence of various forms of analytic metaphysics The new forms of metaphysics differ from its

traditional forms mostly in their methodology we may notice various applications of contemporary formal logical techniques and in the range of proposed solutions to particular problems Besides these and other differences however there are also many similarities and there are even some who intentionally develop traditional metaphysical themes using the contemporary analytical methods All these developments call for detailed exploration which is the general goal of the present publication

Metaphysics Aristotelian Scholastic Analytic The publication is the fruit of the conference which took place in Prague in 2010 and which had for its aim to bring together those willing to explore relations between the traditional and contemporary concerns both from among the leading analytic philosophers working in metaphysics and the historians of philosophy devoted to the study of the metaphysical tradition The specific focus of the conference was a re examination of topics such as categories metaphysical structure substance and accident existence modalities and predication
