Choosing Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century. Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions. Other contributors, however, pose broader questions about the nature of selective admissions, about institutional responses to the changing demography of those seeking to enter higher education, or about the appropriate criteria of success in higher education. The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan. Diversity is an important concern of all of the contributors, and the chapter by Lee Bollinger, President at Michigan at the time the court cases were filed, is particularly relevant. This book brings together the research that underlies a variety of proposed approaches to improving the selection of students. Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body, this book explores the implications of the assessment component of K-12 school reform for higher education admissions practices. The diverse contributions to this volume reflect
