Apple's Secret Of Success - Traditional Marketing Vs. Cult Marketing Sascha Schneiders, 2011 There is possibly no other company which is so casual and at the same time so powerful as the computer and entertainment manufacturer Apple The company controls the online music market the market for portable music players and is now capturing the high tech mobile phone market Apple moves into new electronic markets with strong competitors in order to monopolise them just a short time later The CEO Steve Jobs has brought a brand into being that is different and at the same time mainstream A strong magnetic brand which yields more influence in people s life than one would care to admit This is absolutely the reason why every company in the world wishes for a strong magnetic brand which can be defined as a CULT BRAND They get repeatedly chosen over the competition They bring higher prices than the competition And if they are a strong enough brand their customers not only use their products but evangelize them to the world This project aims to analyze Apple s marketing activities in order to figure out what makes this company so successful It adds to the traditional marketing theory the new theory of cult marketing because traditional marketing delivers no approach to explain the behavior of cult brands The phenomena of a Cult Brand are comparable to the patterns of a religion and Apple as well has strong believers When it comes to their favorite brand they enjoy telling who ever will listen how great it is and why they love it so much People are camping in front of Apple s stores just to get their latest innovative product And if their Messiah Steve Jobs enters the stage to introduce a new product to thousands of viewers he brings the house down This book discusses Apple s unique Marketing Strategy and delivers a guideline on the Example of Apple of the needed conditions to convert an ordinary brand into a CULT BRAND

5 point slope form examples with simple explanations - Sep 11 2022

dec 15 2022 this free step by step lesson guide explores the point slope form equation and how it can be used to solve 5 point slope form example problems detailed explanations and answers are included

writing equations converting among forms sparknotes - Apr 06 2022

thus to convert to point slope form first convert to slope intercept form then move the constant term b to the left side of the equation or isolate x and then divide by the y coefficient example convert $3x + 4y = 8$ to point slope form

point slope slope intercept equations algebra video khan academy - Mar 17 2023

point slope is the general form $y - y_1 = m(x - x_1)$ for linear equations it emphasizes the slope of the line and a point on the line that is not the y intercept we can rewrite an equation in point slope form to be in slope intercept form $y = mx + b$ to highlight the same line's slope and y intercept

point slope form of a line mathwarehouse com - Jan 15 2023

overview of different forms of a line's equation there are many different ways that you can express the equation of a line there is the slope intercept form standard form and also this page's topic point slope form each one expresses the equation of a line and each one has its own pros and cons point slope form this page's topic makes it easy to find the line's

intro to point slope form algebra video khan academy - Aug 22 2023

the point slope form is very useful when you don't have your y intercept it is used to write equations when you only have your slope and a point point slope form $y - a = m(x - b)$ for example your slope m is 3 and your point a, b is 9, 10 you would substitute your y coordinate for a and your x coordinate for b

point slope form simply explained w 17 examples calcworkshop - Jun 08 2022

jan 20 2020 how to find $y = mx + b$ with two points find the y intercept given two points use $y - y_1 = m(x - x_1)$ to write the equation of the line given the point $(4, 5)$ and slope of 6 find y when $x = 24$ so together we are going to learn how to write the equation of a line using point slope form represent equations from point slope form to slope intercept form
