Ibhawoh,2019-03-14 This book draws attention to emerging issues around the rights of minorities marginalized groups and persons in Africa It explores the gaps between human rights provisions and conditions showing that although international human rights principles have been embraced in the continent various minority groups and marginalized persons are denied such rights through criminalization and persecution African countries have a good record of signing and ratifying international and regional rights instruments but the political will and capacity for enforcing these with respect to minorities remain weak International contributors to the book provide new perspectives on the rights of marginalized and minority groups in different parts of Africa and the extent to which they are deprived or denied entitlement to the universality and equality articulated in law The authors show that human rights while having come of age as a moral ideal has not been fully entrenched in practice towards groups such as children indigenous populations the mentally ill persons with disabilities and persons with albinism This volume is geared toward scholars students human rights groups policy makers social workers international organizations and policy makers in the fields of criminology security studies development studies political science sociology children studies social psychology international relations postcolonial studies and African Studies

biofuels has already been much debated but the focus to date has largely been on Latin America and deforestation this highly original work breaks fresh ground in looking at the African perspective Most African governments see biofuels as having the potential to increase agricultural productivity and export incomes and thus strengthen their national economies improving energy balances and rural employment At the same time climate change may be addressed through reduction of green house gas emissions There are however a number of uncertainties mounting that challenge this scenario Using cutting edge empirical case studies this knowledge gap is addressed in a variety of chapters examining the effects of large scale biofuel production on African agriculture In particular land grabbing and food security issues are scrutinised both of which have become vital topics in regard to the environmental and developmental governance of African countries A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa

**Land and the Politics of Belonging in West Africa**, 2005-12-01 Recognizing that land rights are ambiguous negotiable and politically embedded these case studies explore the long term processes and recent changes in contemporary rural West Africa affecting the conversion of control over land into social and political capital and vice versa They point to the colonial origins of what came to be viewed as customary tenure and to the legal pluralism characterizing pre colonial tenure arrangements Furthermore they show the spiritual and ritual importance of land that can be converted into political power and economic prerogatives a dimension neglected by much of the recent literature Analyses cover forest and savannah state and segmentary societies facilitating comparison and insights across the Anglo Francophone divide

**Contemporary Customary Land Issues in Africa** J. Oloka-Onyango, Bridget Bwalya Umar, 2018-07-26 This book examines current trends in customary land issues in Africa focusing on the practice of converting customary land into leasehold tenure particularly in Zambia Since the enactment of the 1995 Lands Act No 29 in

Zambia conversion of customary land has become a controversial policy raising questions about the future of customary land and rural communities and the role of traditional authorities in a changing environment Alienating customary land into leasehold tenure has serious implications for local and national politics and gender dynamics Analysis of these trends suggests that the policy of creating land markets on customary land is subjecting customary systems to the forces of change However governments that have adopted this policy have not by and large adopted measures to respond to these challenges Although customary tenure is widely believed to be resilient it is not clear how the customary system will navigate the current winds of change Chapters in this book draw from the Land Use and Rural Livelihoods in Africa Project LURLAP a collaborative research project undertaken by staff and students at the University of Cape Town and the University of Zambia
