In this in-depth portrait of the monarch butterfly, covering its life cycle, its remarkable relationship with milkweed, its extraordinary migration, and the threats it now faces due to habitat loss and climate change, detailed instructions on how to design and create monarch-friendly landscapes are enriched by guidance on observing and understanding butterfly behavior and habits. Following the model of their previous best-selling book, *100 Plants to Feed the Bees*, the Xerces Society provides at a glance profiles of the plant species that provide monarchs with nourishment. Introduction to Video Search Engines David C. Gibbon, Zhu Liu, 2008-09-20 The evolution of technology has set the stage for the rapid growth of the video Web. Broadband Internet access is ubiquitous and streaming media protocols, systems and encoding standards are mature. In addition to Web video delivery, users can easily contribute content captured on low cost camera phones and other consumer products. The media and entertainment industry no longer views these developments as a threat to their established business practices but as an opportunity to provide services for more viewers in a wider range of consumption contexts. The emergence of IPTV and mobile video services offers unprecedented access to an ever growing number of broadcast channels and provides the flexibility to deliver new, more personalized video services. Highly capable portable media players allow us to take this personalized content with us and to consume it even in places where the network does not reach. Video search engines enable users to take advantage of these emerging video resources for a wide variety of applications including entertainment, education and communications. However, the task of information extraction from video for retrieval applications is challenging, providing opportunities for innovation. This book aims to first describe the current state of video search engine technology and second to inform those with the requisite technical skills of the opportunities to contribute to the development of this field. Today's Web search engines have greatly improved the accessibility and therefore the value of the Web.
