Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader s Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader s Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of

Subject Guide to Books in Print , 1971 **American Book Publishing Record** , 2003 *Forthcoming Books* Rose Army, 2000-06

Viewpoints Mary Strong, Laena Wilder, 2009-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained professionals alone However having access to a good set of tools does not guarantee accurate and reliable work Visual anthropology involves much more than media alone This book presents visual anthropology as a work in progress open to the myriad innovations that the new audiovisual communications technologies bring to the field It is intended to aid in contextualizing explaining and humanizing the storehouse of visual knowledge that university students and general readers now encounter and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes Concentrating on documentary photography and ethnographic film as well as lesser known areas of study and presentation including dance painting architecture archaeology and primate research the book s fifteen contributors feature populations living on all of the

world's continents as well as within the United States. The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings.

Encyclopedia of the Documentary Film 3-Volume Set Ian Aitken, 2013-10-18. The Encyclopedia of the Documentary Film is a fully international reference work on the history of the documentary film from the Lumière brothers' *Workers Leaving the Lumière Factory* (1885) to Michael Moore's *Fahrenheit 9/11* (2004). This Encyclopedia provides a resource that critically analyzes that history in all its aspects. Not only does this Encyclopedia examine individual films and the careers of individual film makers, it also provides overview articles of national and regional documentary film history. It explains concepts and themes in the study of documentary film, the techniques used in making films, and the institutions that support their production, appreciation, and preservation.

Anthropology News, 2009 **Books in Print Supplement**, 2002 *The Ethnographer's Eye* Anna Grimshaw, 2001-04-30. Grimshaw's exploration of the role of vision within modern anthropology engages with current debates about ocularcentism, investigating the relationship between vision and knowledge in ethnographic enquiry. Using John Berger's notion of ways of seeing, the author argues that vision operates differently as a technique and theory of knowledge within the discipline. In the first part of the book, she examines contrasting visions at work in the so-called classical British school, reassessing the legacy of Rivers, Malinowski, and Radcliffe-Brown through the lens of early modern art and cinema. In the second part of the book, the changing relationship between vision and knowledge is explored through the anthropology of Jean Rouch, David and Judith MacDougall, and Melissa Llewelyn Davies. Vision is foregrounded in the work of these contemporary ethnographers, focusing more general questions about technique and epistemology: whether image-based media are used or not in ethnographic enquiry.

Sight and Sound, 1991 *Ethnographic Film* Karl G. Heider, 2006-11-01. From reviews of the first edition: *Ethnographic Film* can rightly be considered a film primer for anthropologists. Choice: This is an interesting and useful book about what it means to be ethnographic and how this might affect ethnographic filmmaking for the better. It obviously belongs in all departments of anthropology, and most ethnographic filmmakers will want to read it. *Ethnohistory*: Even before Robert Flaherty released *Nanook of the North* in 1922, anthropologists were producing films about the lifeways of native peoples for a public audience as well as for research and teaching. *Ethnographic Film* (1976) was one of the first books to provide a comprehensive introduction to this field of visual anthropology, and it quickly became the standard reference. In this new edition, Karl G. Heider thoroughly updates *Ethnographic Film* to reflect developments in the field over the three decades since its publication, focusing on the work of four seminal filmmakers: Jean Rouch, John Marshall, Robert

Gardner and Timothy Asch He begins with an introduction to ethnographic film and a history of the medium He then considers many attributes of ethnographic film including the crucial need to present whole acts whole bodies whole interactions and whole people to preserve the integrity of the cultural context Heider also discusses numerous aspects of making ethnographic films from ethics and finances to technical considerations such as film versus video and preserving the filmed record He concludes with a look at using ethnographic film in teaching

Exploring Culture and Gender Through Film Christian Hammons, 2018-08-08

Exploring Culture and Gender through Film introduces cultural anthropology through concepts and case studies presented in a variety of media The book pairs accessible documentaries and ethnographic films with written material that addresses the same themes and issues It provides conceptual tools and background information to help students understand both the visual and written content The material is loosely organized into three sections The first focuses on basic concepts in anthropology while the second applies these concepts to the subject of inequality The final section broadens this application to include issues in globalization Specific topics include ethnography ritual and gender tribal politics shatter zones social media and social movements stories of the black market and genocide While ideally designed to be used in conjunction with the suggested films the book also successfully stands alone as an introduction to cultural anthropology through contemporary issues Exploring Culture and Gender through Film is a fresh interesting choice for courses in social and cultural anthropology It can also be used as a supplemental reader for classes in media studies or contemporary issues
