Seeing Landscapes:

On Landscapes Susan Herrington, 2013-12-19 There is no escaping landscape it s everywhere and part of everyone s life Landscapes have received much less attention in aesthetics than those arts we can choose to ignore such as painting or music but they can tell us a lot about the ethical and aesthetic values of the societies that produce them Drawing on examples from a wide range of landscapes from around the world and throughout history Susan Herrington considers the ways landscapes can affect our emotions our imaginations and our understanding of the passage of time *On Landscapes* reveals the design work involved in even the most naturalistic of landscapes and the ways in which contemporary landscapes are turning the challenges of the industrial past into opportunities for the future Inviting us to thoughtfully see and experience the landscapes that we encounter in our daily lives *On Landscapes* demonstrates that art is all around us

Rational Landscapes and Humanistic Geography Edward Relph, 2015-07-30 This book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment The source of this paradox where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason But humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian These confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected Such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people This environmental humility is explored in the context of individuality of settings ways of seeing landscapes appropriation and ways of building places This title will be of interest to students of human geography *Thoreaus Sense of Place* Richard J. Schneider, 2000-05 Recent Thoreau studies have shifted to an emphasis on the green Thoreau on Thoreau the environmentalist rooted firmly in particular places and interacting with particular objects In the wake of Buell s *Environmental Imagination* the nineteen essayists in this challenging volume address the central questions in Thoreau studies today how green how immersed in a sense of place was Thoreau really and how has this sense of place affected the tradition of nature writing in America The contributors to this stimulating collection address the ways in which Thoreau and his successors attempt to cope with the basic epistemological split between perceiver and place inherent in writing about nature related discussions involve the kinds of discourse most effective for writing about place They focus on the impact on Thoreau and his successors of culturally constructed assumptions deriving from science politics race gender history and literary conventions Finally they explore the implications surrounding a writer s appropriation or even exploitation of places and objects **Assessing Public Concern for Landscape Quality** Arthur W. Magill, 1992 *Landscapes and Social Transformations on the Northwest Coast* Jeff

Oliver,2010 Nordamerika Kolonialzeit Landschaft Raumkonzepte soziale Konstruktion **Landscape and History Since 1500** Ian D. Whyte,2002 Landscape and History explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe

Landscape, Literature and English Religious Culture, 1660-1800 R. Mayhew,2004-03-15 Landscape Literature and English Religious Culture 1660 1800 offers a powerful revisionist account of the intellectual significance of landscape descriptions during the long Eighteenth century Landscape has long been a major arena for debate about the nature of Eighteenth century English culture this book surveys those debates and offers a provocative new account Mayhew shows that describing landscape was a religiously contested practice and that different theological positions led differing authors to different descriptive approaches Landscape description then shows English intellectual life still in the grips of a Christian and classical mentality in the long Eighteenth century **Landscapes Beyond Land** Arnar Árnason,Nicolas Ellison,Jo Vergunst,Andrew Whitehouse,2012-09-01 Land is embedded in a multitude of material and cultural contexts through which the human experience of landscape emerges Ethnographers with their participative methodologies long term co residence and concern with the quotidian aspects of the places where they work are well positioned to describe landscapes in this fullest of senses The contributors explore how landscapes become known primarily through movement and journeying rather than stasis Working across four continents they explain how landscapes are constituted and recollected in the stories people tell of their journeys through them and how in turn these stories are embedded in landscaped forms **Seeing Landscapes**

Landscape Perspectives Marc Antrop,Veerle Van Eetvelde,2017-12-19 Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today s specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept

Making Bourbon Karl Raitz,2020-03-17 While other industries chase after the new and improved bourbon makers celebrate traditions that hearken back to an authentic frontier craft Distillers enshrine local history in their branding and time tested recipes and rightfully so Kentucky s unique geography shaped the whiskeys its settlers produced and for more than two centuries distilling bourbon fundamentally altered every aspect of Kentucky s landscape and culture Making Bourbon A Geographical History of Distilling in Nineteenth Century Kentucky illuminates how the specific geography culture

and ecology of the Bluegrass converged and gave birth to Kentucky's favorite barrel aged whiskey Expanding on his fall 2019 release Bourbon's Backroads Karl Raitz delivers a more nuanced discussion of bourbon's evolution by contrasting the fates of two distilleries in Scott and Nelson Counties In the nineteenth century distilling changed from an artisanal craft practiced by farmers and millers to a large scale mechanized industry The resulting infrastructure farms mills turnpikes railroads steamboats lumberyards and cooperage shops left its permanent mark on the land and traditions of the commonwealth Today multinational brands emphasize and even construct this local heritage This unique interdisciplinary study uncovers the complex history poured into every glass of bourbon **Handbook of Cultural Geography** Kay Anderson, Mona

Domosh, Steve Pile, Nigel Thrift, 2002-11-20 Having just read this book cover to cover I can honestly say that I have not felt so excited about the discipline of geography since I was in my first year at college Overall therefore this is a truly wonderful book and the first comprehensive analysis of the cultural turn that geography has taken the pitfalls which lie ahead and the course which needs to be chartered Innovative invigorating passionate and groundbreaking it makes you feel great about being a cultural geographer even if you never knew you were one Space and Polity I never expected to call a handbook compulsive reading but this wonderful volume changed all my preconceptions of what cultural geographers can do Absorbing and thought provoking this is collaborative intellectual work at its imaginative best it situates explains and questions cultural geography as a style of thought and in the process imparts such vitality and joy from thinking in that style that this reader wants to join in This Handbook can inform and inspire anyone concerned in any way with cultural research today Meaghan Morris Chair Professor of Cultural Studies Lingnan University Hong Kong The Handbook of Cultural Geography lives up to its name It is a book about where things are how people live what life means and why events happen It should be carried at all times by anyone who is curious about the world Crammed within its covers is a wealth of detail about the power to make history and shape geography This is a catalogue of the disagreements and alliances that shape the world and of the politics and costs of engaging with that world The book is comprehensive yet has depth accessible as well as experimental and challenging without being too daunting Each page contains something that seems highly familiar yet curiously strange The message of course is that what we normally take for granted is so strange The achievement is that after reading the Handbook the world will never seem normal again Susan J Smith Ogilvie Professor of Geography The University of Edinburgh A richly plural and impassioned representation of cultural geography that eschews everything in the way of boundary drawing and fixity A re-visioning of the field as a set of engagements with the world it contains a vibrant atlas of ever shifting possibilities Throbbing with commitment and undisciplined in the most positive sense of that term it is exactly what a handbook ought to be Professor Allan Pred Department of Geography University of California at Berkeley A handbook with attitude and purpose bristling with vitality openness and novelty Dispelling with fixtures canons and retrofits an imaginative cast in the hands of four of the most exciting contemporary cultural geographers opens up the cultural plural culture as
