OECD Economic Surveys: South Africa 2008 OECD, 2008-07-15 OECD's first review of South Africa's economy After a general overview of recent economic

developments and programmes this survey examines key challenges including reforming goods and services markets and realising South Africa's employment

The Evolving Structure of South Africa's Economy Seeraj Mohamed, Amuzweni Ngoma, 2024-01-23 South Africa still faces low economic growth and high unemployment coupled with the persistent challenges of poverty and inequality. These exert pressure on South Africa to foster structural transformation that will facilitate a more inclusive and resilient economy. Authors apply multiple theoretical and empirical perspectives to take stock of the historical and contemporary structure of the South African economy, its evolving nature and possible future pathways. They explore how South Africa's structural transformation agenda is affected by the global context and discuss debates on the extreme social impacts of globalised and financialised economic structures. Contributors offer technical and analytical discussions of the overlapping structural faultlines that produce uneven economic performance. They explain the changes and continuities of South Africa's economic structure bound by an analytical thread that centres power relations and political settlements. Varied chapters explain how poor governance and corruption have slowed down structural reform. This has been further exacerbated by the inconsistent availability of energy and the deterioration of logistics. The book details the structural reforms and policy regimes necessary for increasing productive capacity in South Africa's agriculture, manufacturing, agro-processing, retail and services, energy and mining industries. It also reflects on the role that micro and informal enterprises can play if afforded the necessary support. The technical details and analyses in the book highlight the need for a radical review of macroeconomic policy to reduce the country's chronic vulnerability to poverty and inequality.

Entrepreneurial Ecosystem Mathew J Manimala, Kishinchand Poornima Wasdani, 2015-02-09 Economic development is a priority for all nation states whether developing or developed. In recent times a few among the developing nations often referred to as the emerging economies have attracted the world's attention because of their fast pace of economic growth. While the similarities among these nations, for example the BRICS, in the pattern of their economic growth are highlighted and discussed, the differences are often glossed over. This book therefore attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies through a compilation of research papers from six different countries: India, China, Singapore, Hong Kong, Nigeria and New Zealand, belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity, mapping for reducing failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of muddling through to development necessitated by the non

systematic development of the ecosystem for new venture creation This book is indeed a must read for those interested in understanding the process of entrepreneurship and economic development in emerging economies **The Palgrave Handbook of Development Economics** Machiko Nissanke, José Antonio Ocampo, 2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development **Values, Interests and Power: South African foreign policy in uncertain times** Daniel D. 1997 Asian financial crisis generated extensive debate on the international financial architecture Through this discussion it became clear that services by financial institutions including adequate mechanisms for preventing and managing financial crises and instruments for safeguarding global macroeconomic and financial stability are undersupplied Furthermore private international capital markets provide finance to developing countries in a way that effectively reduces the ability of those nations to undertake countercyclical macroeconomic policies International capital markets ration out many developing countries particularly the poorest from private global capital markets While these deficiencies in the financial architecture are clear the post 1997 debate has done little to evaluate the role that regional institutions could play in improving global financial arrangements Regional Financial Cooperation aims to fill that important gap Contributors include Ernest Aryeetey Institute of Statistical Social and Economic Research University of Ghana Georges Corm Saint Joseph University Beirut Roy Culpeper North South Institute Ottawa Ana Teresa Fuzzo de Lima Institute of Development Studies University of Sussex Stephany Griffith Jones Institute of Development Studies University of Sussex Julia Leung Hong Kong Monetary Authority Jos Luis Machinea ECLAC Jae Ha Park Korean Institute of Finance Yung Chul Park Korea University Fernando Prada FORO Nacionall International Lima Guillermo Rozenwurcel School of Politics and Government University of San Martin Argentina

Government-Linked Companies and Sustainable, Equitable Development Terence Gomez, François Bafoil, Kee-Cheok Cheong, 2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America

developed countries These policy responses contributed significantly to the recovery of the world economy in 2010 and 2011 In particular the strong and fast responses of Brazil China and India helped mitigate deflationary risks and avoid a repetition of the Great Depression of the early 1930s On the other hand reforms of financial regulation and supervision are taking time to advance and little progress has been achieved so far in implementing measures to reduce global imbalances and to avoid a malfunctioning of the international exchange rate system These would contribute to greater coherence between the international trading and financial systems and to creating a more stable international economic environment for development This is a collection of papers that contribute to the debate on these topics putting the South at centre stage It examines how the countries of the South were affected by the global economic and financial crisis and how they responded to it
