 Weems, Edwin Albert Link, 1940 **The Practical Guide to Celestial Navigation** Phil Somerville, 2022-01-04 The jargon
 free guide to celestial navigation know what to do step by step understand why you're doing it and be confident that you can
 put it into practice when on board Did you know that a person standing on the equator is effectively travelling at 900mph
 And did you know that you can use this information to work out where you are in the world to an accuracy of about 3 4 miles
 No GPS no computers Just a sextant some tables from an Almanac and the knowledge in this book It's the only back up if the
 GPS goes down so it's a matter of safety So if you want to qualify as a commercial skipper superyacht captain you need to
 know how to carry out celestial navigation And if you want to pass the RYA Ocean Yachtmaster exam you need to know it too
 It's a major stumbling block for many sailors wanting or needing to take their next qualifications and the other books on the
 market are complex and often assume some prior understanding This book fulfils the need for a jargon free explanation of
 celestial navigation illustrated with colour diagrams and including unique checklist sheets to enable you to repeat all those
 calculations you learned back at home when you're on deck Without overwhelming the reader with a load of theory from the
 off the author breaks down what you need to do step by step explaining why at every point giving the information context and
 making it more interesting and memorable He has trained students in this subject for years and here he's able to use his
 experiences of what works and what are the common pitfalls he even includes a What went wrong chapter near the end
 going through errors commonly made and how to spot them The objective is that readers will finish the book not only
 knowing what to do but really understanding why and being able to make sense of it all again later rather than just getting
 through an exam and finding themselves at a loss when on deck The author also includes time tested proformas quick
 reference sheets that sailors can refer to when they come to putting the theory into practice on board avoiding the terrifying
 cold start that most sailors experience when they suddenly need to put theory into practice Practical Celestial Navigation
