Selected Papers on Optical Fibers in Medicine Abraham Katzir, 1990 SPIE Milestones are collections of seminal papers from the world literature covering important discoveries and developments in optics and photonics *Optics in Our Time* Mohammad D. Al-Amri, Mohamed El-Gomati, M. Suhail Zubairy, 2016-12-12 Light and light based technologies have played an important role in transforming our lives via scientific contributions spanned over thousands of years In this book we present a vast collection of articles on various aspects of light and its applications in the contemporary world at a popular or semi popular level These articles are written by the world authorities in their respective fields This is therefore a rare volume where the world experts have come together to present the developments in this most important field of science in an almost pedagogical manner This volume covers five aspects related to light The first presents two articles one on the history of the nature of light and the other on the scientific achievements of Ibn Haitham Alhazen who is broadly considered the father of modern optics These are then followed by an article on ultrafast phenomena and the invisible world The third part includes papers on specific sources of light the discoveries of which have revolutionized optical technologies in our lifetime They discuss the nature and the characteristics of lasers Solid state lighting based on the Light Emitting Diode LED technology and finally modern electron optics and its relationship to the Muslim golden age in science The book s fourth part discusses various applications of optics and light in today s world including biophotonics art optical communication nanotechnology the eye as an optical instrument remote sensing and optics in medicine In turn the last part focuses on quantum optics a modern field that grew out of the interaction of light and matter Topics addressed include atom optics slow stored and stationary light optical tests of the foundation of physics quantum mechanical properties of light fields carrying orbital angular momentum quantum communication and Wave Particle dualism in action National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1991 **Specialty Optical Fibers Handbook** Alexis Mendez, T. F. Morse, 2011-10-10 This book is a comprehensive contributed volume that aims to describe and explain the design fabrication operating characteristics and specific applications of the most popular and useful types of specialty optical fibers These specialty fibers include any kind of optical fiber that has been architecturally manipulated to diverge from a conventional structure For instance metal coated fibers can be utilized for bandwidth improvement and hollow core fibers offer more controllable dispersion for sensitive medical procedures Applications for these specialty fibers abound in the biomedical sensors and industrial fields as well as in more traditional communications capacities This book will act as a specialty fiber guided tour hosted by the top names in the discipline The globally renowned editors Drs Mendez and Morse have extensive experience in research academia and industry Completely covers biomedical and industrial sensor technology with emphasis on real world applications Comparative studies of pros and cons of all fiber types with relation to test and measurement mechanical properties and strength and reliability Easy to access essential facts and details at the beginning of each chapter
