Ambarcumjan, Mark Grigor'evich Kreĭn, Oleg Vasilievich Sarmanov, 1963 *Selected Translations in Mathematical Statistics and Probability. Volume 4*, 1963 *Selected Translations in Mathematical Statistics and Probability* G. P. Cistjakov, 1961 **Operator Theory, System Theory and Related Topics**

Daniel Alpay, Victor Vinnikov, 2012-12-06 This volume presents the refereed proceedings of the Conference in Operator Theory in Honour of Moshe Livsic 80th Birthday held June 29 to July 4 1997 at the Ben Gurion University of the Negev Beer Sheva Israel and at the Weizmann Institute of Science Rehovot Israel The volume contains papers in operator theory and its applications understood in a very wide sense many of them reflecting directly or indirectly a profound impact of the work of Moshe Livsic Moshe Mikhail Samuilovich Livsic was born on July 4 1917 in the small town of Pokotilova near Uman in the province of Kiev in the Ukraine his family moved to Odessa when he was four years old In 1933 he enrolled in the Department of Physics and Mathematics at the Odessa State University where he became a student of M G Krein and an active participant in Krein's seminar one of the centres where the ideas and methods of functional analysis and operator theory were being developed Besides M G Krein M S Livsic was strongly influenced by V A Levin an outstanding specialist in the theory of analytic functions A by deep understanding of operator theory as well as function theory and a penetrating search of connections between the two were to become one of the landmarks of M S Livsic's work M S Livsic defended his Ph D **Handbook of Computational and Numerical Methods in Finance** Svetlozar T. Rachev, 2011-06-28

Numerical Methods in Finance have recently emerged as a new discipline at the intersection of probability theory finance and numerical analysis They bridge the gap between financial theory and computational practice and provide solutions to problems where analytical methods are often non applicable Numerical methods are more and more used in several topics of financial analysis computation of complex derivatives market credit and operational risk assessment asset liability management optimal portfolio theory financial econometrics and others Although numerical methods in finance have been studied intensively in recent years many theoretical and practical financial aspects have yet to be explored This volume presents current research focusing on various numerical methods in finance The contributions cover methodological issues Genetic Algorithms Neural Networks Monte Carlo methods Finite Difference Methods Stochastic Portfolio Optimization as well as the application of other numerical methods in finance and risk management As editor I am grateful to the contributors for their fruitful collaboration I would particularly like to thank Stefan Trueck and Carlo Marinelli for the excellent editorial assistance received over the progress of this project Thomas Plum did a splendid word processing job in preparing the manuscript I owe much to George Anastassiou Consultant Editor Birkhauser and Ann Kostant Executive Editor Mathematics and Physics Birkhauser for their help and encouragement Order, Disorder And Criticality: Advanced Problems Of Phase Transition

Theory - Volume 6 Yuriy Holovatch, 2020-06-22 This book is the sixth volume of reviews on advanced problems of phase

transitions and critical phenomena with the first five volumes appearing in 2004 2007 2012 2015 and 2018 It aims to provide an overview of those aspects of criticality and related topics that have attracted much attention due to the recent contributions The six chapters discuss criticality of complex systems where the new emergent properties appear via collective behaviour of simple elements Since all complex systems involve cooperative behaviour between many interconnected components the field of phase transitions and critical phenomena provides a very natural conceptual and methodological framework for their study As for the previous volumes this book is based on the review lectures that were given in Lviv Ukraine at the Ising lectures a traditional annual workshop on phase transitions and critical phenomena which aims to bring together scientists working in the field of phase transitions with university students and those who are interested in the topic The level of presentation makes the book readable both for professionals and the students in the field On a larger scale the book may contribute to promoting and deepening studies of phase transitions and critical phenomena

Naval Research Logistics Quarterly ,1964 *The Annals of Mathematical Statistics* ,1971 **On Measures of Information and Their Characterizations** Acze?l,1975-12-17 This book deals with measures of information the most important ones being called entropies their properties and reciprocally with questions concerning which of these properties determine known measures of information and which are the most general formulas satisfying reasonable requirements on practical measures of information This is the first book investigating this subject in depth **Continuous Bivariate Distributions** N. Balakrishnan, Chin Diew Lai, 2009-05-31 Along with a review of general developments relating to bivariate distributions this volume also covers copulas a subject which has grown immensely in recent years In addition it examines conditionally specified distributions and skewed distributions
