Filmosophy Daniel Frampton, 2006 Filmosophy is a manifesto for a radically philosophical way of understanding cinema. The book coalesces 20th century ideas of film as thought into a practical theory of film thinking, arguing that film style conveys poetic ideas through a constant dramatic intent about the characters, spaces, and events of film.

Sino-Vatican Relations Ambrose Mong, 2019-01-01 For those interested in Christianity in China, the state church relationship, and the present Communist regime and its attitude towards religion, Sino Vatican Relations offers a wealth of information and insights. This work traces the tortuous history of the relationship between the Chinese government and the Roman Catholic Church from denunciation of Communism by the Church to seeking dialogue by recent pontiffs such as John Paul II, Benedict XVI, and Francis. Besides examining the religious policy of China since 1949 and how the Chinese government deals with religious revivals, this work also traces the history of the church regarding the appointment of bishops in Europe from its early days to modern times. Monarchies in Europe have always been involved in the appointment of bishops. Thus, the recent agreement between Pope Francis and the Chinese authorities regarding the appointment of bishops has historical precedents. The overall aim of this work is to help readers to get the right information needed to have a well-informed opinion on the complex matter of the Sino Vatican Relations, particularly on the agreement signed by Pope Francis with Beijing in 2018.

The Constitution of Ancient China Su Li, 2018-08-07 How was the vast ancient Chinese empire brought together and effectively ruled? What are the historical origins of the resilience of contemporary China's political system? In *The Constitution of Ancient China*, Su Li, China's most influential legal theorist, examines the ways in which a series of fundamental institutions, rather than a supreme legal code upholding the laws of the land, evolved and coalesced into an effective constitution. Arguing that a constitution is an institutional response to a set of issues particular to a specific society, Su Li demonstrates how China unified a vast territory, diverse cultures, and elites from different backgrounds into a whole. He delves into such areas as uniform weights and measurements, the standardization of Chinese characters, and the building of the Great Wall. The book includes commentaries by four leading Chinese scholars in law, philosophy, and intellectual history: Wang Hui, Liu Han, Wu Fei, and Zhao Xiaoli, who share Su Li's ambition to explain the resilience of ancient China's political system but who contend that he overstates functionalist dimensions while downplaying the symbolic. Exploring why China has endured as one political entity for over two thousand years, *The Constitution of Ancient China* will be essential reading for anyone interested in understanding the institutional legacy of the Chinese empire.
