Adolf Grünbaum

Selected Works Volume I:

Collected Works, Volume I Adolf Grünbaum, 2013-07-16 Adolf Grünbaum is one of the giants of 20th century philosophy of science. This volume is the first of three collecting his most essential and highly influential work. The essays collected in this first volume focus on three related areas. They discuss scientific rationality, the problem of what it takes for a theory to be called scientific, and ask whether it is plausible to draw a clear distinction between science and non-science as was famously proposed by Karl Popper. They delve into the debate between determinism and indeterminism in both science and in the humanities. Grünbaum defends the position of the Humane Determinist, which then leads to a thorough criticism of the current theological approaches to ethics and morality where Grünbaum defends an explicit Secular Humanism as well as of prominent theistic interpretations of twentieth century physical cosmologies. The second volume is devoted to Grünbaum's writings on the Philosophy of Physics and Space Time and the third to his lectures on the Philosophy of Psychology and Psychoanalysis including his 1985 Gifford Lectures which are to be published for the first time. **Collected works Kurt Gödel, 1986** Kurt Gödel 1906-1978 was the most outstanding logician of the 20th century. This second volume of Gödel's works collects the remainder of his published work covering the period 1938-1974. Each article or closely related group of articles is preceded by an introductory note that elucidates it and places it in its historical context. Kurt Gödel: Collected Works: Volume IV Kurt Gödel, 2013-10 Kurt Gödel 1906-1978 was the most outstanding logician of the twentieth century. These collected works form the only comprehensive edition of Gödel's work available and are designed to be useful and accessible to as wide an audience as possible without sacrificing scientific or historical accuracy. Collected Works, Volume 1 V. I. Lenin, 2017-10-03 Re-launch of the Collected Works of the legendary revolutionary in paperback. Among the most influential political and social forces of the twentieth century, modern communism rests firmly on philosophical, political, and economic underpinnings developed by Vladimir Ilyich Ulyanov, later known as Lenin. For anyone who seeks to understand the twentieth century, capitalism, the Russian Revolution, and the role of Communism in the tumultuous political and social movements that have shaped the modern world, the works of Lenin offer unparalleled insight and understanding. Taken together, they represent a balanced cross-section of his revolutionary theories of history, politics, and economics; his tactics for securing and retaining power; and his vision of a new social and economic order. This first volume contains four works: *New Economic Developments in Peasant Life*, *On the So-Called Market Question*, *What the Friends of the People Are*, and *How They Fight*, the Social Democrats' *The Economic Content of Narodism*, and the *Criticism of It* in Mr. Struve's Book, written by Lenin in 1893-1894 at the outset of his revolutionary activity during the first years of the struggle to establish a workers' revolutionary party in Russia. Wilhelm Dilthey: Selected Works, Volume III Wilhelm Dilthey, 2021-07-13 This volume provides Dilthey's most mature and best formulation of his *Critique of Historical Reason*. It begins with three *Studies Toward the Foundation of the Human Sciences* in which Dilthey refashions Husserlian concepts to describe the basic structures of consciousness relevant

to historical understanding The volume next presents the major 1910 work *The Formation of the Historical World in the Human Sciences* Here Dilthey considers the degree to which carriers of history individuals cultures institutions and communities can be articulated as productive systems capable of generating value and meaning and of realizing purposes Hegel's idea of objective spirit is reconceived in a more empirical form to designate the medium of commonality in which historical beings are immersed Any universal claims about history need to be framed within the specific productive systems analyzed by the various human sciences Dilthey's drafts for the *Continuation of the Formation* contain extensive discussions of the categories most important for our knowledge of historical life meaning value purpose time and development He also examines the contributions of autobiography to historical understanding and of biography to scientific history The finest summary of Dilthey's views on hermeneutics can be found in *The Understanding of Other Persons and Their Manifestations of Life* Here Dilthey differentiates understanding relative to three kinds of manifestations of life After giving his analysis of elementary understanding he examines the role of induction in higher understanding and interpretation and the relevance of transposition and re-experiencing for grasping individuality *Collected Works, Volume 3* V. I. Lenin, 2019-02-26 Re launch of the *Collected Works* of the legendary revolutionary in paperback Among the most influential political and social forces of the twentieth century modern communism rests firmly on philosophical political and economic underpinnings developed by Vladimir Ilyich Ulyanov later known as Lenin For anyone who seeks to understand capitalism the Russian Revolution and the role of communism in the tumultuous political and social movements that have shaped the modern world the works of Lenin offer unparalleled insight and understanding **Wilhelm Dilthey: Selected Works, Volume VI** Wilhelm Dilthey, 2019-11-12 This book completes a landmark six volume translation of the major writings of Wilhelm Dilthey 1833-1911 a philosopher and historian of culture who continues to have a significant influence on philosophy hermeneutics and the theory of the human sciences These volumes make available to English readers texts that represent the full range of Dilthey's work The works in this volume present Dilthey's most deeply held views about philosophy and how it can guide human practices *System of Ethics* 1890 argues that Humean sympathy motivates us only externally and must be replaced with the internally motivated fellow feeling of solidarity that respects others as ends in themselves *The Essence of Philosophy* 1907 demonstrates how philosophy has developed from its traditional metaphysical role to the epistemological and encyclopedic functions that ground and order the natural and human sciences The work also discloses an orientational function of philosophy that is explored further in *The Types of World View and Their Development* 1911 Philosophical world views are important in that they address the existential needs and riddles that grow out of life experience and are not solved by any of the sciences In addition the book features three other significant essays *Present Day Culture and Philosophy* 1898 concerns the challenges to philosophy posed by contemporary culture *Dream* 1903 is about the thinkers portrayed in Raphael's *School of Athens* and Dilthey's worries about them breaking up into three divergent groups Finally *The Problem of Religion* 1911

considers how religiosity can still inform lived experience in secular times Kurt Gödel: Collected Works: Volume V Kurt Gödel, 2013-10 Kurt Gödel 1906-1978 was the most outstanding logician of the twentieth century These collected works form the only comprehensive edition of Gödel's work available and are designed to be useful and accessible to as wide an audience as possible without sacrificing scientific or historical accuracy Advances and Applications of DSMT for Information Fusion (Collected Works, Volume 5) Florentin Smarandache, Jean Dezert, Albena Tchamova, 2023-12-27 This fifth volume on Advances and Applications of DSMT for Information Fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics and is available in open access The collected contributions of this volume have either been published or presented after disseminating the fourth volume in 2015 available at fs.unm.edu/DSMT/book4.pdf or www.onera.fr/sites/default/files/297_2015_DSMT_Book4.pdf in international conferences seminars workshops and journals or they are new The contributions of each part of this volume are chronologically ordered First Part of this book presents some theoretical advances on DSMT dealing mainly with modified Proportional Conflict Redistribution Rules PCR of combination with degree of intersection coarsening techniques interval calculus for PCR thanks to set inversion via interval analysis SIVIA rough set classifiers canonical decomposition of dichotomous belief functions fast PCR fusion fast inter criteria analysis with PCR and improved PCR5 and PCR6 rules preserving the quasi neutrality of quasi vacuous belief assignment in the fusion of sources of evidence with their Matlab codes Because more applications of DSMT have emerged in the past years since the apparition of the fourth book of DSMT in 2015 the second part of this volume is about selected applications of DSMT mainly in building change detection object recognition quality of data association in tracking perception in robotics risk assessment for torrent protection and multi criteria decision making multi modal image fusion coarsening techniques recommender system levee characterization and assessment human heading perception trust assessment robotics biometrics failure detection GPS systems inter criteria analysis group decision human activity recognition storm prediction data association for autonomous vehicles identification of maritime vessels fusion of support vector machines SVM Silx Furtif RUST code library for information fusion including PCR rules and network for ship classification Finally the third part presents interesting contributions related to belief functions in general published or presented along the years since 2015 These contributions are related with decision making under uncertainty belief approximations probability transformations new distances between belief functions non classical multi criteria decision making problems with belief functions generalization of Bayes theorem image processing data association entropy and cross entropy measures fuzzy evidence numbers negator of belief mass human activity recognition information fusion for breast cancer therapy imbalanced data classification and hybrid techniques mixing deep learning with belief functions as well We want to thank all the contributors of this fifth volume for their research works and their interests in the development of DSMT and the belief functions We are grateful as well to other colleagues for encouraging us to edit this fifth volume and for sharing with us several ideas and for
