Theology and World Politics Vassilios Paipais, 2020-03-02 Situated within the wider post secular turn in politics and international relations this volume focuses not on religion per se but rather explicitly on theology Contributions to this collection highlight the political theological foundations of international theory and world politics recasting theology and politics as symbiotic discourses with all the risks promises and open questions this relation may involve The overarching claim the book makes is that all politics has theology embedded in it both in the genealogical sense of carrying ineradicable traces of rival theological traditions and also in the more ontological sense of being enacted by alternative configurations of the theologico political The book is unique in bringing together a diverse group of scholars spanning knowledge areas as varied as IR political theory philosophy theology and history to investigate the complex interconnections between theology and world politics It will be of interest to students and scholars of political theory international relations intellectual history and political theology

The Political Humanism of Hannah Arendt Michael H. McCarthy, 2012-08-17 At the end of the Second World War when the horror of the holocaust became known Hannah Arendt committed herself to a work of remembrance and reflection Intellectual integrity demanded that we comprehend and articulate the genesis and meaning of totalitarian terror What earlier spiritual and moral collapse had made totalitarian regimes possible What was the basis of their evident mass appeal To what cultural resources and political institutions and traditions could we turn to prevent their recurrence After years of profound study Arendt concluded that the deepest crisis of the modern world was political and that the enduring appeal of political mass movements demonstrated how profound that crisis had become For Arendt the modern political crisis is also a crisis of humanism The radical totalitarian experiment was rooted in two distorted images of the human being The agents of terror believed in the limitless power generated by strategic organization a power exercised without restraint and justified by appeal to historical necessity The victims of terror by contrast were systematically dehumanized by the ruling ideology and then brutally deprived of their legal rights and their moral and existential dignity Arendt s political humanism directly challenges both of these distorted images the first because it dangerously inflates human power the second because it deliberately subverts human freedom and agency This book offers a dialectical account of the political crisis that Arendt identified and shows why her interpretation of that crisis is especially relevant today The author also provides detailed analysis and appraisal of Arendt s political humanism the revisionary anthropology she based on the politically engaged republican citizen Finally the work distinguishes the merits from the limitations of Arendt s genealogical critique of our tradition of political thought showing that she tended to be right in what

she affirmed and wrong in what she excluded or omitted *Maya In Radhakrishnan'S Thought* Donald A. Braue,1984-01-01

Political Ideologies Vincent Geoghegan,Rick Wilford,2014-03-21 Now in its fourth edition *Political Ideologies* An Introduction continues to be the best introductory textbook for students of political ideologies Completely revised and updated throughout this edition features A comprehensive introduction to all of the most important ideologies Brand new chapters on multiculturalism anarchism and the growing influence of religion on politics More contemporary examples of twenty first century iterations of liberalism socialism conservatism fascism green political theory nationalism and feminism Enhanced discussion of the end of ideology debates and emerging theories of ideological formation Six new contributors Accessible and packed with both historical and contemporary examples this is the most useful textbooks for scholars and students of political ideologies The contributors to this volume have all taught or carried out research at the School of Politics International Studies and Philosophy of Queen s University Belfast or have close research connections with the School **Decrypting Power** Ricardo Sanín-Restrepo,2020-05-19 *Decrypting Power* aims to reach a unifying concept that allows the connection of the fundamental theses stemming from critical legal studies Subaltern studies decolonization law and society global political economy critical geopolitics and theories of de coloniality This volume proposes that this concept is the encryption of power a category of analysis that reveals the weakness of political liberalism when it takes the place of the legitimate fundament of democracy as well as its consummate capacity to conceal new mechanisms of global power The theory of encryption of power understands that there is only a world where difference exists as the fundamental and sole order but also that such a possibility is heavily obstructed by the concentration of power in forms of oppression The world hangs on the thread of this entangled reality made up of difference and its denial of democracy and its simulations of truth and its codifications The decryption of power is then above all a theory of justice essential to radical democracy which comes fully equipped to prevail over the conditions that deny the possibility of an egalitarian world
