Objective

Selective awareness is the tendency to get more and more familiarized and involved with certain aspect of the environment or completely cease to do so.

We will try to analyze the continuum of selective awareness from clinical, social and psychological perspectives.

Exploring Psychology, Eighth Edition, In Modules David G. Myers, 2010-07-08 Exploring Psychology Eighth Edition in Modules is the modular version of the 1 bestselling brief introduction to psychology David Myers's Exploring Psychology All the Myers hallmarks are here the captivating writing coverage based on the latest research helpful pedagogical support in a format that delivers the utmost in student accessibility and teaching flexibility Deep Healing Emmett E. Miller, M.D., 1996-12-01 Deep Healing brings new hope to every reader It awakens even the most skeptical among us to the miraculous inborn self healing capacities of our mind body Emmett Miller M D practicing as a traditional family doctor for 20 years discovered that when a part of your body is sick the whole body system is out of balance He saw that how his patients thought about and saw life affected and seemed to create whatever their current state of health was He has stated that it is not enough to heal the particular illness without understanding the emotional and psychological basis for the ailment or problem We must heal the entire person not just a specific part Dr Miller has had great success with guided imagery to promote physical health and emotional well being He has even been successful using guided imagery to do minor surgery without any anesthetic again proving the mind body connection and the control of our bodies by our thoughts Through the presentation of stories reflections and case studies Dr Miller presents his wonderful deep healing theories that will instill a new sense of hope and optimism into all who read this book **Attention and consciousness in different senses**

Naotsugu Tsuchiya, Jeroen J. Van Boxtel, 2013-06-03 Although often used in everyday speech and in the scholarly literature selective attention and consciousness lack clear undisputed definitions Partly because of this deficit there exists a lively debate on the relationship between the two Nevertheless attention has been studied scientifically for a long time because a variety of tasks allow researchers to control several of its aspects e g focused and feature based attention Consciousness as a scientific subject of study has emerged more recently but is now rapidly gaining traction Scientific studies of consciousness concern the state or level of consciousness e g awake as opposed to in coma dreamless sleep or under anaesthesia as well as the contents of consciousness or the phenomenology of perception With the increase in consciousness focused research there is a concomitant surge in research examining the relationship between attention and consciousness This relationship between attention and consciousness is the topic of this Research Topic Contributions related to or focused solely on attention or on consciousness will not be considered It had long been assumed that attention and consciousness are inextricably intertwined two sides of the same coin However recently substantial evidence has emerged that attention and consciousness are interacting but separable processes It is however debated how tight the interactions are and what the exact nature of the relationship is Therefore we invite researchers from different camps to provide opinionated but balanced

literature reviews Different groups will interpret the same data in different ways We feel that combining these views in one Research Topic is immensely valuable to researchers from different fields Apart from reviews we also invite potential contributors to provide new and exciting evidence in the form of original contributions that may support any of the different views Even though attention and consciousness are critical aspects of many different cognitive processes they are mainly studied though not exclusively in the domain of visual perception In other sensory modalities e g olfaction or audition it is currently not clear whether distinctions between attention and consciousness exist which is even more true for other cognitive processes such as memory Therefore we specifically invite contributions covering the auditory somatosensory olfactory and memory domain We ask all contributors to provide discussions on the relationship between attention and consciousness and focus on 1 the influence of attention on sensory processing 2 the formation of conscious perception 3 the evidence for unconscious processing and its modulation by attention 4 potential indications for dissociations between attention and consciousness e g does paying attention to a stimulus decrease performance on e g a discrimination task 5 neuroimaging and neurophysiology data pertaining to these questions Often one is caught in one s own research field and lacks the time or the knowledge to delve into another field This Research Topic should provide a great overview in great breadth of the current state of knowledge on the links between attention and consciousness and their interactions in several different sensory modalities

Exploring Psychology David G. Myers, 2004-04-02 David Myers s bestselling brief text has opened millions of students eyes to the world of psychology Through vivid writing and integrated use of the SQ3R learning system Survey Question Read Rehearse Review Myers offers a portrait of psychology that captivates students while guiding them to a deep and lasting understanding of the complexities of this field
