Self Disclosure An Experimental Analysis Of The Transparent Self:

Self-disclosure Sidney M. Jourard, 1971 **The Transparent Self** Sidney M. Jourard, 1964 **Self-disclosure** Sidney M. Jourard, 1979 Self-Disclosure Valerian J. Derlaga, John H. Berg, 1987-07-31

Decisions about self disclosure whether to reveal one's thoughts, feelings or past experiences to another person or the level of intimacy of such disclosure are part of the everyday life of most persons. The nature of the decisions that a person makes will have an impact on his or her life. They will determine the kinds of relationships the person has with others, how others perceive him or her, and the degree of self knowledge and awareness that the person possesses. The study of self disclosure has interested specialists from many disciplines including personality and social psychologists, clinical and counseling psychologists, and communications researchers. Our book brings together the work of experts from these various disciplines with the hope that knowledge about work being done on self disclosure in related disciplines will be increased. A strong emphasis in each of the chapters is theory development and the integration of ideas about self disclosure. The book's chapters explore three major areas including the interrelationship of self disclosure and personality as well as the role of self disclosure in the development, maintenance, and deterioration of personal relationships and the contribution of self disclosure to psychotherapy, marital therapy, and counseling.

Situational Privacy and Self-Disclosure Philipp K. Masur, 2018-06-28

Using both a theoretical argumentation and an empirical investigation, this book rationalizes the view that in order to understand people's privacy perceptions and behaviors, a situational perspective needs to be adopted. To this end, the book is divided into three parts. Part I advances the theory of situational privacy and self disclosure by discussing impacts of new information and communication technologies on traditional theories of privacy and self disclosure. Based on five basic suppositions, it describes three major processes of the theory: pre-situational privacy regulations, processes of situational privacy perception, and self disclosure processes, and post-situational evaluation processes. Next, Part II presents the application of the theory to smartphone-based communication. It first analyses how people choose certain communication environments on their smartphones, how they manipulate them, and how these external factors affect self disclosure within these environments. It then details a multi-method study conducted to test the derived assumptions and discusses the obtained results. Part III reflects on the overall implications of the theory, summarizes the major findings, and lastly considers possible extensions and perspectives on future research. Intended mainly for researchers in privacy and communication studies, the book offers privacy scholars a systematic review of both classic and contemporary theories of privacy and self disclosure. At the same time, communication scholars benefit from an additional methodological discussion of the mobile experience sampling method, which provides an invaluable approach to measuring situational communication processes.
