Self Expressions Owen J. Flanagan, 1996 Human beings have the unique ability to consciously reflect on the nature of the self But reflection has its costs We can ask what the self is but as David Hume pointed out the self once reflected upon may be nowhere to be found The favored view is that we are material beings living in the material world But if so a host of destabilizing questions surface If persons are just a sophisticated sort of animal then what sense is there to the idea that we are free agents who control our own destinies What makes the life of any animal even one as sophisticated as Homo sapiens worth anything What place is there in a material world for God And if there is no place for a God then what hold can morality possibly have on us why isn't everything allowed Flanagan's collection of essays takes on these questions and more He continues the old philosophical project of reconciling a scientific view of ourselves with a view of ourselves as agents of free will and meaning makers But to this project he brings the latest insights of neuroscience cognitive science and psychiatry exploring topics such as whether the conscious mind can be explained scientifically whether dreams are self expressive or just noise the moral socialization of children and the nature of psychological phenomena such as multiple personality disorder and false memory syndrome What emerges from these explorations is a liberating vision which can make sense of the self agency character transformation and the value and worth of human life Flanagan concludes that nothing about a scientific view of persons must lead to nihilism

Well-being Neera Kapur Badhwar, 2014 In Well Being Happiness in a Worthwhile Life Neera K Badhwar offers a new argument for the ancient claim that well being as the highest prudential

good eudaimonia consists of happiness in a virtuous life Virtue is a source of happiness but happiness also requires external goods The argument takes into account recent work on happiness well being and virtue and defends a neo Aristotelian conception of virtue as an integrated but limited intellectual emotional action disposition These conceptions of well being and virtue are argued to be widely held and compatible with experimental psychology Badhwar s main argument for the thesis that well being as the highest prudential good requires virtue is as follows i well being as the highest prudential good requires an objectively worthwhile life ii such a life entails realism as a character trait iii realism entails a life of virtue iv hence well being as the highest prudential good requires a life of virtue A realistic person understands important aspects of her own life and human life in general and is disposed to act on her understanding Her understanding springs from her autonomy and reality orientation i e her disposition to think for herself and seek truth or understanding But the demands of virtue in the face of our emotional and cognitive limitations make complete virtue impossible and this is one reason why complete well being is also impossible

### **The Bodhisattva's Brain** Owen Flanagan,2013-09-13

This fascinating introduction to the intersection between religion neuroscience and moral philosophy asks Can there be a Buddhism without karma nirvana and reincarnation that is compatible with the rest of knowledge If we are material beings living in a material world and all the scientific evidence suggests that we are then we must find existential meaning if there is such a thing in this physical world We must cast our lot with the natural rather than the supernatural Many Westerners with spiritual but not religious inclinations are attracted to Buddhism almost as a kind of moral mental hygiene But as Owen Flanagan points out in

The Bodhisattva's Brain Buddhism is hardly naturalistic In The Bodhisattva's Brain Flanagan argues that it is possible to discover in Buddhism a rich empirically responsible philosophy that could point us to one path of human flourishing Some claim that neuroscience is in the process of validating Buddhism empirically but Flanagan naturalized Buddhism does not reduce itself to a brain scan showing happiness patterns Buddhism naturalized as Flanagan constructs it offers instead a fully naturalistic and comprehensive philosophy compatible with the rest of knowledge a way of conceiving of the human predicament of thinking about meaning for finite material beings living in a material world Proofs of God Matthew Levering, 2016-04-12 Leading theologian Matthew Levering presents a thoroughgoing critical survey of the proofs of God's existence for readers interested in traditional Christian responses to the problem of atheism Beginning with Tertullian and ending with Karl Barth Levering covers twenty one theologians and philosophers from the early church to the modern period examining how they answered the critics of their day He also shows the relevance of the classical arguments to contemporary debates and challenges to Christianity In addition to students this book will appeal to readers of apologetics

**Phenomenology of Life. Meeting the Challenges of the Present-Day World** Anna-Teresa Tymieniecka, 2006-03-30 Philosophy has been always received or bypassed for its resonance or aloofness with the spirit of the time Should not philosophy phenomenology of life be expected to do more to ascertain its validity Should it not pass the pragmatic test that is to respond directly to the life concerns of its time What is the role of the philosopher and philosophy today Due to the ever advancing scientific technological social and cultural changes that are shaping human life and the life world in transformation we are desperately seeking a measure to estimate life's unfolding a compass to stir the course between Scylla and Charibda to maintain human hood and creative insight for laying the cornerstones for the unforeseeable unfolding of life dynamisms It is this challenge which philosophy phenomenology of life meets with underlying onto-poietic unraveling of the hidden logico concatenations of beingness in becoming The present collection of essays offers contributions to answer this challenge by focusing upon measure sharing in life intersubjectivity and communication societal equilibrium education and more It will be of great interest to those working in the fields of Phenomenology Philosophy History of Philosophy and Contemporary Philosophy

Hindsight Mark Philip Freeman, 2010 Mark Freeman argues here that hindsight looking back over the past from the standpoint of the present can be a profoundly important source of understanding insight and moral growth Indeed hindsight can be and often is a source of truth of a sort Freeman contends that is only available by looking backward Drawing on

psychology philosophy literature memoir and personal experience this engaging volume offers an insightful exploration of the role of hindsight both in discerning the truth of one s past and in crafting a good and worthy life
