Self Handicapping The Paradox That Isn't:

Self-Handicapping Raymond L. Higgins, C.R. Snyder, Steven Berglas, 1990-06-30 Self handicapping is a protective psychological mechanism for controlling the conditions of performance in order to provide a built in attribution for failure. The apparent paradox is that the choice of inhibiting conditions makes failure more likely thus undermining the very competence image that self handicapping is designed to protect. This volume **Self-Handicapping** Raymond L. Higgins, C.R. Snyder, Steven Berglas, 2013-09-28 The concept of self handicapping can be legitimately anchored in a variety of intellectual contexts some old and some newer. As this volume reminds us Alfred Adler was perhaps the first to articulate the significance of various self defeating claims and gestures for protecting the self concept. Thus the apparent paradox of defeat in the interests of protection. More recently but still more than 30 years ago Heider's naive psychology added attributional rhetoric to the description of self defeating strategies. While predominantly cognitive in its thrust the attributional approach incorporated several motivational influences especially those involving egocentric concerns. Heider hardly violated our common sense when he suggested that people are inclined to attribute their performances in a self serving manner the good things I caused the bad things were forced upon me. The notion of self handicapping strategies proposed by Berglas and myself a little more than a decade ago capitalized on these homely truths while adding a particular proactive twist. We not only make excuses for our blunders we plan our engagements and our situational choices so that self protective excuses are unnecessary. In doing so we use our attributional understanding to arrange things so that flawed and failing performances will not be interpreted in ways that threaten our self esteem. **Self-Handicapping** Raymond L. Social Psychology in Sport Sophia Jowett, David Lavalley, 2007 The book is designed to allow readers to study issues in isolation or as part of a course or a module. The five

main parts are Relationships in Sport Coach Leadership and Group Dynamics Motivational Climate Key Social and Cognitive Processes in Sport and The Athlete in the Wider Sport Environment Each chapter is cross referenced and provides a clear description of the topic and a concise theoretical overview along with a discussion of existing research The chapters also introduce new research ideas suggest practical research applications and conclude with summaries and questions to help instructors engage the class in discussion and to help students follow the key points Publisher s website The Social Self Joseph P. Forgas, Kipling D. Williams, 2014-02-04 What is the nature of the self how do everyday experiences shape it and how does it influence our thinking judgements and behaviors Such questions constitute enduring puzzles in psychology and are also of critical practical importance for applied domains such as clinical counseling educational and organizational psychology In this book a select group of eminent international researchers survey the most recent advances in research of the self In particular they discuss the influence of cognitive and intra psychic processes Part 1 interpersonal and relational variables Part 2 and inter group phenomena on the self Part 3 *Groups at Work* Marlene E. Turner, 2014-04-04 This book has two purposes First it is fundamentally about groups at work both as they attempt to accomplish their goals and as they operate in organizational settings Second it draws together group researchers from social psychological and organizational studies Each chapter focuses on a central issue regarding groups as they work and examines that issue by drawing from both social psychological and organizational research Thus this book centers on the convergence and divergence of these two fields *Health Risks and Developmental Transitions During Adolescence* John Schulenberg, Jennifer L. Maggs, Klaus Hurrelmann, 1999-07-28 Health and well being during adolescence depends largely on the fit between the young person s developmental needs and desires and opportunities provided by the changing context In *Health Risks and Developmental Transitions* prominent researchers in the adolescent field examine how various developmental transitions associated with the passage from childhood to adulthood provide risks and opportunities for adolescents mental and physical health Given the importance of adolescence in determining the course of health and well being across the life span efforts to ease the various transitions into and out of adolescence will yield long term health benefits By focusing on the link between health risks developmental transitions individual and contextual conditions and planned interventions that moderate the link this interdisciplinary book provides the foundation for a unifying framework for research and application in health and human development **Social Psychology** Robin R. Vallacher, Peter M. Gollwitzer, 2024-12-31 This topical textbook provides a thorough insight into the discipline of social psychology presenting students with a rich and engaging account of the human social experience Fully revised the second edition includes a greater emphasis on cutting edge topics within social psychology including AI virtual reality social media and political polarization The textbook uses an accessible and readable style to show how the field s dizzying and highly fragmented array of topics models theories and paradigms can best be understood through a coherent conceptual narrative that builds on learning from previous chapters The text also examines

recent developments such as how computer simulations and big data supplement the traditional methods of experiment and correlation. It contains a range of features including key term glossaries and compact summing up and looking ahead overviews for ease of reading. *Social Psychology Exploring the Dynamics of Human Experience* covers an enormous range of topics from self concept to social change making this comprehensive textbook essential reading for any student of social psychology.

Building Classroom Success Andrew Martin, 2016-02-29 School has the potential to be a major source of personal and academic fulfilment. However the reality is that fear and failure pervade many students' academic lives. Rather than respond to these fears in constructive and courageous ways many students engage in self-defeating avoidant and helpless behaviours. This book examines the counterproductive strategies students use in schools today and suggests successful practices educators can adopt to eliminate fear and failure in the classroom and help students respond to their problematic behaviours in more positive and productive ways. Through building student success educators build classroom success.

Control Motivation and Social Cognition Gifford Weary, Faith Gleicher, Kerry L. Marsh, 2012-12-06 Over the past two decades theorists and researchers have given increasing attention to the effects both beneficial and harmful of various control-related motivations and beliefs. People's notions of how much personal control they have or desire to have over important events in their lives have been used to explain a host of performance and adaptational outcomes including motivational and performance deficits associated with learned helplessness. Abramson, Seligman, Rodin 1986 cardiovascular disease; Matthews 1982 cancer; Sklar, Ryckman 1979 and post-abortion adjustment; Mueller, Jones, Kelley 1967 for example have suggested that causal inferences arise from a desire to render the social world predictable and controllable. Similarly control has been implicated as an important mediator of cognitive dissonance. Wicklund, Kiesler, Collins, Miller 1969. Despite the apparent centrality of control motivation to a variety of social psychological phenomena until recently there has been relatively little research explicitly concerned with the effects of control motivation on the cognitive processes underlying such phenomena. cf
