Self Imagined Philosophical Reflections On The Social Character Of Psyche:

The Self Imagined Karen Hanson,1986-01-01

The Social Self in Zen and American Pragmatism Steve

Odin,1996-01-01 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as individual society interaction It is also shown for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism

Socializing Metaphysics Frederick F. Schmitt,2004-09-01 Human life is conducted within a network of social relations social groups and societies Grasping the implications of that fact starts with understanding social metaphysics Social metaphysics provides a foundation for social theory as well as for social epistemology philosophy of language philosophy of mind action theory ethics and political philosophy This volume will interest anyone concerned with mind action or the foundations of social theory *Socializing Metaphysics* supplies diverse answers from a broad array of voices to the basic questions of social metaphysics What is it for human beings to stand in social relations or form social groups Do these relations and groups bring about something above and beyond the individuals involved Is there any sense to the notion of a

human being apart from social relations How can an individual achieve autonomy within a society In what sense are human kinds like race and gender socially constructed The answers are found within **Dynamic Embodiment for Social Theory** Brenda Farnell,2012-02-27 This book presents a series of ontological investigations into an adequate theory of embodiment for the social sciences Informed by a new realist philosophy of causal powers it seeks to articulate a concept of dynamic embodiment one that positions human body movement and not just the body at the heart of theories of social action It draws together several lines of thinking in contemporary social science about the human body and its movements adequate meta theoretical explanations of agency and causality in human action relations between moving and talking skill and the formation of knowledge metaphor perception and the senses movement literacy the constitution of space and place and narrative performance This is an ontological inquiry that is richly grounded in and supported by anthropological ethnographic evidence Using the work of Rom Harr Roy Bhaskar Charles Varela and Drid Williams this book applies causal powers theory to a revised ontology of personhood and discusses why the adequate location of human agency is crucial for the social sciences The breakthrough lies in fact that new realism affords us an account of embodied human agency as a generative causal power that is grounded in our corporeal materiality thereby connecting natural physical and cultural worlds **Dynamic Embodiment for Social Theory** is compelling reading for students and academics of the social sciences especially anthropologists and sociologists of the body and those interested in new developments in critical realism **The Oxford Handbook of American Philosophy** Cheryl Misak,2008-09-25 This is the first collective study of the development of philosophy in America from the 18th century to the present Leading experts examine distinctive features of American philosophy trace notable themes and consider the legacy of key figures A fascinating resource for anyone interested in modern philosophy or American intellectual history **The Critical Theory of Axel Honneth** Danielle Petherbridge,2013-09-05 **The Critical Theory of Axel Honneth** provides a comprehensive study of the work of Axel Honneth tracing the theoretical trajectory from his earliest writings on philosophical anthropology to the development of a theory of recognition The book argues that Honneth s early work provides important insights for the reconstruction of the normative project of critical theory and the articulation of a conceptual framework for analyzing social relations of power and domination Danielle Petherbridge contends however that these aims are not fully realized in Honneth s more mature project and that central insights recede as his project develops Petherbridge seeks to demonstrate that the basis for an alternative theory of intersubjectivity that can account for both an adequate theory of power and normative forms of subject formation can be immanently reconstructed from within Honneth s own work By contextualizing Honneth s project in relation to its theoretical influences **The Critical Theory of Axel Honneth** provides a critical study and excellent entry point that will be essential reading for both students and scholars who work in the areas of European philosophy critical theory social and political philosophy or social and political theory *The Timeliness of George Herbert Mead* Hans Joas, Daniel R.

Huebner,2016-10-17 George Herbert Mead is widely considered one of the most influential American philosophers of the twentieth century and his work remains vibrant and relevant to many areas of scholarly inquiry today The Timeliness of George Herbert Mead brings together a range of scholars who provide detailed analyses of Mead s importance to innovative fields of scholarship including cognitive science environmental studies democratic epistemology and social ethics non teleological historiography and the history of the natural and social sciences Edited by well respected Mead scholars Hans Joas and Daniel R Huebner the volume as a whole makes a coherent statement that places Mead in dialogue with current research pushing these domains of scholarship forward while also revitalizing the growing literature on an author who has an ongoing and major influence on sociology psychology and philosophy **A Mind Of One's Own** Louise Antony,Charlotte Witt,2018-03-08 With philosophy so steeped in patriarchal tradition how is it possible for feminists to work within it In this volume 13 feminist theorists discuss whether traditional ideals of objectivity and rationality should be given a place within the committed feminist view of philosophy and the world **The Philosopher's "I"** J. Lenore Wright,2012-02-01 This book examines philosophers autobiographies as a genre of philosophical writing Author J Lenore Wright focuses her attention on five philosophical autobiographies Augustine s Confessions Descartes Meditations Rousseau s The Confessions Nietzsche s Ecce Homo and Hazel Barnes s The Story I Tell Myself In the context of first person narration she shows how the philosophers in question turn their attention inward and unleash their analytical rigor on themselves Wright argues that philosophical autobiography makes philosophical analysis necessary and that one cannot unfold without the other Her distinction between the ontological and rhetorical dimensions of the self creates a rich middle ground in which questions of essence and identity bear upon existence
