Korten, 2010-10-19 By the author of the bestsellers *When Corporations Rule the World* and *The Great Turning* Offers bold economic reforms that attack the underlying cause of the current economic collapse not just its symptoms A radical but achievable program that restores and builds on the fundamental strengths of the American economy Today's economic crisis is the worst since the Great Depression However as David Korten shows the steps being taken to address it including pouring trillions of dollars into bailouts for the Wall Street institutions that created the mess do nothing to deal with the reality of a failed economic system It's like treating cancer with Band Aids And the financial collapse now in the public spotlight is only the tip of the iceberg The system's social and environmental failures may ultimately be even more destructive Korten identifies the deeper sources of the failure Wall Street institutions that have perfected the art of creating wealth without producing anything of real value phantom wealth Its major players engage in speculative trading buy into asset bubbles create debt pyramids and engage in predatory lending practices Their seeming success created an economic mirage that led us to believe the economy was expanding exponentially even as our economic social and natural capital eroded and most people struggled ever harder to make ends meet Our hope lies not with Wall Street Korten argues but with Main Street which creates real wealth from real resources to meet real needs He outlines an agenda to liberate the latent entrepreneurial energies of Main Street from Wall Street's deadly grip and bring into being a new economy locally based community oriented and devoted to creating a better life for all It will require courageous and imaginative changes to how we measure economic success organize our financial system even the very way we create money Korten outlines a challenging but practical agenda summarized at the end of the book in his version of the economic address to the nation he wishes Barack Obama were able to deliver Korten's intention is not to offer final answers but rather to provoke discussion of options that powerful interests prefer not be mentioned These interests devised the system that has brought us to the brink of ruin It's time to turn away from the Wall Street system of phantom wealth and return to an economy firmly rooted in the long term health of people and the planet
