Nunziante, 2018-06-14 This edited volume systematically addresses the connection between Wilfrid Sellars and the history of modern philosophy exploring both the content and method of this relationship It intends both to analyze Sellars position in relation to singular thinkers of the modern tradition and to inquire into Sellars understanding of philosophy as a field in reflective and constructive conversation with its past The chapters in Part I cover Sellars interpretation and use of Descartes Leibniz Hume Kant and Hegel Part II features essays on his relationship with Peirce Frege Carnap Wittgenstein American pragmatism behaviorism and American realism particularly his father Roy Wood Sellars and the History of Modern Philosophy features original contributions by many of the most renowned Sellars scholars throughout the world It offers an exhaustive survey of Sellars views on the historical antecedents and meta philosophical aspects of his thought **Analyticity** Cory Juhl, Eric Loomis, 2009-09-11 Analyticity or the analytic synthetic distinction is one of the most important and controversial problems in contemporary philosophy In this outstanding introduction to analyticity Cory Juhl and Eric Loomis provide a clear and thorough survey of the problem *Revisiting Discovery and Justification* Jutta Schickore, Friedrich Steinle, 2006-04-18 The distinction between the contexts of discovery and justification has had a turbulent career in philosophy of science At times celebrated as the hallmark of philosophical approaches to science at times condemned as ambiguous distorting and misleading the distinction dominated philosophical debates from the early decades of the twentieth century to the 1980s Until today it informs our conception of the content domain and goals of philosophy of science It is due to this fact that new trends in philosophy of experimentation and history and sociology of science have been marginalized by traditional scholarship in philosophy To acknowledge properly this

important recent work we need to re open the debate about the nature development and significance of the context distinction about its merits and flaws The contributions to this volume provide close readings and detailed analyses of the original textual sources for the context distinction They revise those accounts of forerunners of the distinction that have been written through the lens of Logical Empiricism They map clarify and analyse the derivations and mutations of the context distinctions as we encounter them in current history and philosophy of science The re evaluation of the distinction helps us deal with the philosophical challenges that the New Experimentalism and historically socio politically and economically oriented science studies have placed before us This volume thus clears the ground for the productive and fruitful integration of these new developments into philosophy of science
