**East European Academies in Transition** R. Mayntz, U. Schimank, P. Weingart, 2013-11-11

When the socialist regime in Central and Eastern Europe CEE was overthrown around the end of the eighties beginning of the nineties an overall transformation of whole societies started Not only the political and the economic systems of these countries but all societal sectors underwent deep changes These changes presented opportunities but they also spelled trouble On one hand getting rid of stifling political control and excessive bureaucratic regulation was something which most members of these societies desired On the other it became apparent very soon that the necessary and long hoped for rebuilding of the economy education health care the mass media and science too was strongly restricted by the scarcity of financial resources After a short period during which opportunities were energetically taken up in a spirit of hope came a long and still lasting time of growing troubles and despondency Only in a few of the CEE countries have some glimpses of hope become visible recently and it remains to be seen whether these signals are reliable Until now therefore the transformation dynamics of all societal sectors in all of the CEE countries have primarily been troublesome This is surely true for the post socialist research systems I The demise of the communist party's absolute rule over society has allowed researchers the public expression and the pursuit of goals whose common denominator has been a greater self regulation of scientific research according to its own criteria and logic

**Styles At Work** Sing Ong Yu, 2017-05-11 This book aims to present an overview of Chinese Japanese and Korean modern management styles The cultures of China Japan and Korea are influenced by Confucianism Daoism and Buddhism As such there are some basic similarities in their management styles As business operations become more internationalised the management styles among Chinese Japanese and Korean companies have blurred the lines of distinction between Western and Eastern cultures The need for Western managers to adapt to Asian way of doing business and likewise for Asian companies to understand Western business practices means that managers have to bridge the gaps and adopt the best management practices containing both Western and Eastern elements Unlike the traditional approach of setting clear differentiation between Western and Eastern cultures this book looks at Oriental management from a modern perspective that is the fusion of Western and Eastern management styles By using a multifaceted approach to understanding modern Oriental management the author stresses the complexities of the business environment in China Japan and Korea He suggests that Western theories of management are applicable to Eastern cultural context with some adaptations to the local environment The author also offers valuable insights into the management styles of Oriental managers by providing a critical perspective of their thought processes in simple yet highly relevant illustrations of models and frameworks This book is recommended for those who are interested in attaining a deeper knowledge of Oriental management practices **The**
