entrepreneurship and more specifically agenda setting in selected countries of the Global South *Routledge Handbook of Public Policy* Eduardo Araral,2013 This Handbook provides a comprehensive global survey of the policy process Written by an outstanding line up of distinguished scholars and practitioners the Handbook covers all aspects of the policy process including Theory from rational choice to the new institutionalism Frameworks network theory advocacy coalition and development models Key stages in the process formulation implementation and evaluation Agenda setting and decision making The roles of key actors and institutions This is an invaluable resource for all scholars graduate students and practitioners in public policy and policy analysis Publisher description **Competition, Regulation and the Privatisation of British Rail** John Shaw,2019-05-24 This title was first published in 2000 This work looks at the privatization of British Rail It covers the competition for franchises and the regulation of those franchises The study evaluates the extent to which the promotion of competition was an appropriate policy goal in the privatization of British rail The book examines the rail system as a whole and looks at the prospects for the future **China's Evolving Policy Processes under the Comparative Lenses** Wei Li,2023-12-05 This book takes a broad approach to studying China s policy processes It aims to shed new light on the characteristics of China s political systems and to adapt theoretical frameworks of policy processes developed in Western democracies to China In 2021 Xi Jinping introduced the concept of whole process people s democracy This new discourse calls for a deeper understanding of both traditional and new mechanisms and institutions functioning in China s policy processes Bringing together scholars with extensive fieldwork experience in mainland China and Taiwan this edited volume investigates governance mechanisms and institutions of policy processes in China from different perspectives such as mass line Tiao Kuai coordination and People s Congress The book focuses not only on traditional topics such as agenda setting and policy change but also on political administrative relations policy mix design and delivering service contracts in communities A comparative analysis of three social enterprises in Taiwan is provided as a case study of non governmental actors lack of influence on policies in a context that is different from mainland China This book will appeal to scholars students and practitioners interested in policy processes in mainland China and Taiwan and in comparative theories about policy processes around the world **Handbook of Public Policy Agenda Setting** Nikolaos Zahariadis,Kristin Taylor,2025-09-10 This thoroughly revised and updated second edition explores how and why private matters become public issues and occasionally government priorities drawing on updated contextual studies that speak to more recent scholarship It builds upon the previous edition s comprehensive overview of the perspectives and institutions involved in setting the government s agenda *Ambiguity and Choice in Public Policy* Nikolaos Zahariadis,2003-07-29 Zahariadis offers a theory that explains policymaking when ambiguity is present a state in which there are many ways often irreconcilable of thinking about an issue Expanding and extending John Kingdon s influential multiple streams model that explains agenda setting Zahariadis argues that manipulation the bending of ideas process and beliefs to get what you want out of the policy process

is the key to understanding the dynamics of policymaking in conditions of ambiguity He takes one of the major theories of public policy to the next step in three different ways he extends it to a different form of government parliamentary democracies where Kingdon looked only at what he called the United States s presidential organized anarchy form of government he examines the entire policy formation process not just agenda setting and he applies it to foreign as well as domestic policy This book combines theory with cases to illuminate policymaking in a variety of modern democracies The cases cover economic policymaking in Britain France and Germany foreign policymaking in Greece all compared to the U S where the model was first developed and an innovative computer simulation of the policy process *European Union Policy-Making* Nicole Herweg, 2017-02-23 This book furthers the ongoing theoretical development of the multiple streams framework assessing its applicability to European Union EU policy making processes It systematically defines and identifies functional equivalents for all of the framework s core concepts at the EU level and extends the framework in order to explain agenda setting and decision making Furthermore the book derives a set of explicit hypotheses to empirically assess the extent to which the modified framework is able to explain timing agenda prominence and policy change or a lack thereof for the EU natural gas directives passed in 1998 2003 and 2009 The analysis documents that the framework is well suited to explain the EU policy process in general and reveals where additional theoretical refinements are required

Decision-Making under Ambiguity and Time Constraints Reimut Zohlnhöfer, Friedbert W Rüb, 2016-02-24 Policy issues have grown ever more complex and politically more contestable So governments in advanced democracies often do not understand the problems they have to deal with and do not know how to solve them Thus rational problem solving models are highly unconvincing Conversely the Multiple Streams Framework starts out from these conditions which has led to increasing interest in it Nevertheless there has not yet been a systematic attempt to assess the potential of such scholarship This volume is the first attempt to fill that gap by bringing together a group of international scholars to assess the strengths and weaknesses of the Framework from different angles Chapters explore systematically and empirically the Framework s potential in different national contexts and in policy areas from climate change and foreign policy to healthcare and the welfare state *The Routledge Handbook of Policy Tools* Michael Howlett, 2022-08-10 This handbook provides a unique systematic and comprehensive overview from leading experts in the field of the policy making tools deployed at all the phases of the policy process It covers the fundamentals of both new and established policy tools from regulation and public enterprises to subsidies and information campaigns as well as new tools such as social impact investing nudges crowdsourcing co production and new digital governance and data analysis techniques The book consists of nine sections with five corresponding to the major research emphases of studies on policy tools across the stages of the policy cycle agenda setting formulation decision making implementation and evaluation These are accompanied by overviews of key research and concepts a discussion of how different kinds of tools can be usefully combined in simple or complex policy

portfolios or mixes and a concluding section on future research directions Consolidating the state of knowledge and uniting classic foundational material with recent advancements in theory and practice in one location the handbook is a defining volume in this field The Routledge Handbook of Policy Tools is essential reading and an authoritative reference for scholars students researchers and practitioners of public policy public administration and public management as well as those interested in comparative politics and government public organizations and the use of policy tools and instruments in individual policy areas from climate change to public health
