## Marking A Trail History Of The Texas Womens University:

**Marking a Trail** Joyce Thompson, 1982      **Marking New Trails** Phyllis Bridges, 2014-04-07      **Marking a Trail** Phyllis Bridges, 2001      *Challenged by Coeducation* Leslie Miller-Bernal, Susan L. Poulson, 2007-01-22

Challenged by Coeducation details the responses of women's colleges to the most recent wave of Women's colleges originated in the mid nineteenth century as a response to women's exclusion from higher education. Women's academic successes and their persistent struggles to enter men's colleges resulted in coeducation rapidly becoming the norm. However, still many prestigious institutions remained single sex, notably most of the Ivy League and all of the Seven Sisters colleges. In the mid twentieth century, colleges' concerns about finances and enrollments, as well as ideological pressures to integrate formerly separate social groups, led men's colleges and some women's colleges to become coeducational. The admission of women to practically all men's colleges created a serious challenge for women's colleges. Most people no longer believed women's colleges were necessary since women had virtually unlimited access to higher education. Even though research spawned by the women's movement indicated the benefits to women of a room of their own, few young women remained interested in applying to women's colleges. Challenged by Coeducation details the responses of women's colleges to this latest wave of coeducation. Case studies written expressly for this volume include many types of women's colleges: Catholic and secular, Seven Sisters and less prestigious private and state liberal arts, and more applied northern, southern, and western urban and rural independent and coordinated with a coeducational institution. They demonstrate the principal ways women's colleges have adapted to the new coeducational era: some have been taken over or closed but most have changed by admitting men and thereby becoming coeducational, or by offering new programs to different populations. Some women's colleges, mostly those that are in cities, connected to other colleges, and prestigious with a high endowment, still enjoy success. Despite their dramatic drop in numbers from 250 to fewer than 60, today women's colleges are still important. Editors Miller, Bernal, and Poulson argue. With their commitment to enhancing women's lives, women's colleges and formerly women's colleges can serve as models of egalitarian coeducation.

*Rhetoric at the Margins* David Gold, 2008-03-06. Rhetoric at the Margins: Revising the History of Writing Instruction in American Colleges, 1873-1947, examines the rhetorical education of African American female and working class college students in the late nineteenth and early twentieth centuries. Author David Gold uses archival materials to study three types of institutions historically underrepresented in disciplinary histories: a black liberal arts college in rural East Texas, a public women's college, and an

independent teacher training school The rich case studies complement and challenge previous disciplinary histories and suggest that the epistemological schema that have long applied to pedagogical practices may actually limit our understanding of those practices Gold argues that each of these schools championed intellectual and pedagogical traditions that differed from the Eastern liberal arts model a model that often serves as the standard for rhetorical education He demonstrates that by emphasizing community uplift and civic participation these schools created contexts in which otherwise moribund curricular features of the era such as strict classroom discipline and an emphasis on prescription took on new possibilities Rhetoric at the Margins describes the recent revisionist turn in rhetoric and composition historiography argues for the importance of diverse institutional microhistories and asserts that the nineteenth and early twentieth centuries offer rich lessons for contemporary classroom practice The study brings alive the voices of black female rural southern and first generation college students and their instructors linking these histories to the history of rhetoric and writing **Daughters**

hold out new hope for women professionals especially in the sciences But the public posture of welcoming women into the scientific professions masked a deep seated opposition to change Rossiter proves that despite frustrating obstacles created by the patriarchal structure and values of universities government and industry women scientists made genuine contributions to their fields grew in professional stature and laid the foundation for the breakthroughs that followed 1972
